High Quality, Heavy Duty,
Industrial-Grade Actuators

INDUSTRIAL MOTION

TiMOTION ELECTRONIC LINEAR ACTUATORS – MOTION TECHNOLOGY THAT HELPS PROVIDE A CLEANER, BETTER FUTURE

Many industrial applications require heavy-duty automation on a large scale — especially for agricultural, construction, mining, ventilation, and process control machinery, among others. The technology is out there, and it's only getting better. Equipment manufacturers are increasingly turning to electric linear actuators as a cost-efficient and reliable alternative to previous industry standards, such as hydraulic and pneumatic motion systems. TiMOTION's Industrial Motion product line is shown within this catalog, as well as additional information about what we offer and the full benefits of our linear actuator technology.

Features and Benefits of TiMOTION Actuation Systems for Industrial Applications

- Five year mechanical warranty
- Aluminum and steel construction
- Acme and ball screw drive
- Customization
- Clutch or internal limit switches
- Multiple feedback options
- Easy installation
- Excellent engineering support
- IP69K protection available
- Heavy duty construction
- Low maintenance
- Wide speed range

JP series

TiMOTION's JP series family is designed with inline actuator appearance. All the products in the JP series are ideally suitable for high or low load required industrial applications where up to IP69K dust and liquid ingress protection is necessary. JP series allows for use in limited spaces without sacrificing power.

24mm/s

IP rating
Up to IP69K

Minimum installation dimension
≥ Stroke + 289mm

MA series

TiMOTION's MA series family is specially designed for harsh working environments, requiring a durable, long life solution. All of our MA series actuators are ideal for the heavy-duty machinery, industrial equipment and off road vehicles. In addition, they all comply with IP69K protection that will withstand high temperature, high pressure water jets, and the ingress of dust and other solid contaminants.

2,000N in pull

Maximum speed at full load

45mm/s

IP rating

Up to IP69K

Minimum installation dimension

≥ 238 or 250mm

(upon the front attachment)

TA series

TiMOTION's TA series family is the well-developed product line for industrial market segment. All the products in the TA series have a compact design, and can meet the demands of high force, high speed, and low noise requirements. The TA series is recommended for use in small spaces where force or capability cannot be sacrificed.

TA2 - Page 50

Maximum load
1,000N in pull and push

Maximum speed at full load
51mm/s

≥ 67mm

TGM

series

TiMOTION's TGM (Gear Motor) series is primarily designed for height adjustable table applications. The TGM products allow for fast, smooth and quiet adjustment of built-in spindles through the use of external limit switches. Shafting allows for the mechanical synchronization of dual spindles.

Maximum rated torque
7.2Nm

TL series

TiMOTION's TL (column) series is made up of two or three extruded aluminum tubes of rectangular shape that give the system great stability and a high stroke with reduced retracted length. Our electric lifting columns are perfect for industrial applications such as height adjustable workstations, screen and lifting tables.

TL3 - Page 111

Maximum load
4,000N in push

Maximum speed at full load
24mm/s

28mm/s

Minimum installation dimension
 $\geq \text{Stroke} + 147\text{mm}$

TL18AC - Page 127

Maximum load
4,500N in push

Maximum speed at full load
28mm/s

Minimum installation dimension
 $\geq \text{Stroke} + 183\text{mm}$

JP3

series

TiMOTION's JP3 series inline linear actuator was designed for low load industrial applications where up to IP69K dust and liquid ingress protection is necessary. It is best suited for applications with visual or compact installation dimension requirements. Hall sensors are optional for the JP3 which allow for synchronization and position feedback.

Load and Speed

	CODE	Load (N)		Self Locking Force (N)	Typical Current (A)		Typical Speed (mm/s)	
		Push	Pull		No Load 24V DC	With Load 24V DC	No Load 24V DC	With Load 24V DC
Motor Speed (5600RPM)	B	2000	2000	2000	1.0	3.0	7.0	3.5
	C	1500	1500	1500	1.0	3.0	10.0	6.5
	D	1000	1000	1000	1.0	3.0	14.5	8.5
	E	500	500	500	1.0	3.0	23.5	19.0

NOTE

- 1 Please refer to the approved drawing for the final authentic value.
- 2 This self-locking force level is reached only when a short circuit is applied on the terminals of the motor. All the TiMOTION control boxes have this feature built-in.
- 3 The current & speed in table are tested with 24V DC motor. With a 12V DC motor, the current is approximately twice the current measured in 24V DC; speed will be similar for both voltages.
- 4 The current & speed in table are tested when the actuator is extending under push load.
- 5 The current & speed in table and diagram are tested with a stable 24V DC power supply.

Standard Dimension (mm)

General Features

Maximum load	2,000N in push
Maximum load	500N in pull
Maximum speed at full load	19mm/s (with 500N in a push or pull condition)
Stroke	20~1000mm
Minimum installation dimension	≥ Stroke + 217mm
IP rating	Up to IP69K
Color	Black or grey
Certificate	UL73
Operational temperature range	-5°C~+65°C
Operational temperature range at full performance	+5°C~+45°C
Storage temperature range	-40°C~+70°C
An inline actuator designed for small spaces

JP4

series

TiMOTION's JP4 series inline linear actuator is most similar to the JP3, but was designed for industrial applications that require higher load and speed. Its IP69K protection ensures it will withstand high temperature, high pressure water jets, and the ingress of dust and other solid contaminants. For synchronization and position feedback, the JP4 can be equipped with Hall sensors.

MA1

series

TiMOTION's MA1 series linear actuator is the proven choice for applications requiring a durable, long life solution. Specifically designed for harsh working environments, the MA1 linear actuator is ideal for use in heavy-duty machinery, industrial equipment and off road vehicles. This linear actuator has been certified for applications requiring IP69K compliance. Available options for the MA1 linear actuator include AC or DC power, ball or acme spindles, mechanical or electrical braking and a load limiting clutch or limit switches.

MA2

series

TiMOTION's MA2 series linear actuator was specifically designed for applications which face harsh working environments and require ruggedness and durability. Its IP69K protection ensures it will withstand high temperature, high pressure water jets, and the ingress of dust and other solid contaminants. The MA2 also has optional Reed switches along the outer tube which allow users to adjust the stroke length. For improved control and accuracy of motion, the MA2 can be customized with many different feedback options depending on your application requirements. Example applications suitable for the MA2: Agricultural equipment such as spreaders, harvesters, grain handlers, combines and tractors.

Load and Speed

	CODE	Load (N)		Self Locking Force (N)	Typical Current (A)		Typical Speed (mm/s)	
		Push	Pull		No Load 24V DC	With Load 24V DC	No Load 24V DC	With Load 24V DC
Motor Speed (5200RPM)	F	1000	1000	1300	2.7	8.4	52.5	43.0
	G	2000	2000	2600	2.4	7.5	25.5	22.3
	H	4000	4000	5200	2.3	8.0	13.2	11.1
	J	6000	6000	7800	2.0	6.8	6.6	6.1

NOTE

- 1 With a 12V motor, the current is approximately twice the current measured in 24V. With a 36V motor, the current is approximately two-thirds the current measured in 24V; speed will be similar for both voltages.
- 2 This self-locking force level is reached only when a short circuit is applied on the terminals of the motor. All the TiMotion control boxes have this feature built-in.
- 3 Please refer to the approved drawing for the final authentic value.

Standard Dimension (mm)

General Features

Maximum load	6,000N in push and pull
Maximum speed at full load	43mm/s (with 1000N in a push or pull condition)
Stroke	25~1000mm
Minimum installation dimension	≥ Stroke + 131mm
IP rating	Up to IP69K
Operational temperature range	-30°C~+65°C
Operational temperature range at full performance	+5°C~+45°C
Options	Hall sensor(s), POT

Performance Data

Motor Speed 5200RPM, Duty Cycle 25%

TA2

series

TiMOTION's TA2 series linear actuator is compact, robust and capable of performing well in certain outdoor environments. This linear actuator is perfect for use in small spaces where force or capability cannot be sacrificed. Options include feedback sensors, signal sending limit switches and 90 degree clevis mounting. Industry certifications for the TA2 linear actuator include UL73, EMC.

Load and Speed

	CODE	Load (N)		Self Locking Force (N)	Typical Current (A)		Typical Speed (mm/s)	
		Push	Pull		No Load 24V DC	With Load 24V DC	No Load 24V DC	With Load 24V DC
Motor Speed (4200RPM)	A	120	120	120	0.8	1.2	44.0	32.0
	B	240	240	240	0.7	1.2	22.0	16.5

TA2P

series

Both the TA2 and the TA2P are compact, robust, and capable of performing well in certain outdoor environments. A more powerful motor makes the TA2P capable of handling load ratings up to 3500N (787 pounds) while retaining its compact size. In addition to the high power motor, the TA2P linear actuator is available with multiple choices for feedback sensors. Industry certification for the TA2P linear actuator includes UL73.

TA16

series

TiMOTION's TA16 series linear actuator is similar to the TA2 linear actuator, but is specifically designed for low-noise industrial applications where a compact linear actuator is needed. It is available with optional IP66 protection and Hall sensors for position feedback.

Load and Speed

	CODE	Load (N)		Self Locking Force (N)	Typical Current (A)		Typical Speed (mm/s)	
		Push	Pull		No Load 24V DC	With Load 24V DC	No Load 24V DC	With Load 24V DC
Motor Speed (3800RPM)	A	2500	2500	2500	1.2	2.8	5.2	3.0
	B	2000	2000	2000	1.2	2.8	8.3	4.7
	C	1500	1500	1500	1.2	2.8	11.9	7.0
	D	1000	1000	1000	1.2	2.8	17.7	10.3
Motor Speed (5600RPM)	G	3500	3500	3500	1.5	4.7	12.0	6.5
	J	2000	2000	2000	1.5	3.2	17.0	10.5
	K	1500	1500	1500	1.5	3.5	23.5	13.5

NOTE

- 1 With a 12V motor, the current is approximately twice the current measured in 24V; speed will be similar for both voltages.
- 2 This self-locking force level is reached only when a short circuit is applied on the terminals of the motor. All the TiMOTION control boxes have this feature built-in.
- 3 Current and speed: Tested average value when extending in push direction.
- 4 Please refer to the approved drawing for the final authentic value.

TA21

series

TiMOTION's TA21 electric linear actuator was designed for use in height adjustable industrial workstations. Customers have a high degree of design flexibility with this actuator as it does not include a standard outer tube. This allows manufacturers to decide on the exact aesthetic and ingress specifications for their electric lifting column and overall application.

Load and Speed

CODE	Load (N)		Self Locking Force (N)	Typical Current (A)		Typical Speed (mm/s)		
	Push	Pull		No Load 24V DC	With Load 24V DC	No Load 24V DC	With Load 24V DC

TGM1

series

TiMOTION's TGM1 series gear motor was designed primarily for industrial applications like height adjustable workstations and tables, but can be used in many other applications. This economical product allows for fast, smooth and quiet adjustment of built-in spindles through the use of external limit switches. Shafting allows for the mechanical synchronization of dual spindles.

NOTE

- 1 The combinations of TGM and TBS are marked as "v" on the above table.
- 2 When choosing the combination of TBS2 / 3 and TGM7, the hexagonal drive shaft is not required.
- 3 When choosing the combination of TBS1 / 4 / 5 / 9 / 10 and TGM1 / 3 / 4, the extra order of hexagonal drive shaft is needed.
- 4 Please refer to the table below for the serial numbers and the dimensions of the component.

Plug

0 = Tinned leads

1 = DIN 6P, 90°

2 = Molex 8P

Output Torque

1 = Drive shaft hole (inner hexagon 9mm)

2 = One side drive shaft (Ø12mm, knurling)

3 = Two sides drive shaft (Ø12mm, knurling)

4 = Two sides drive shaft (Ø12mm, with Ø4.8mm latch hole)

5 = Drive shaft hole (inner hexagon 6mm)

TGM3

series

The TGM3 series is TiMOTION's compact size gear motor. It was designed primarily for industrial applications like height adjustable workstations and tables, but can be used in many other applications. This economical product allows for fast, smooth and quiet adjustment of built-in spindles through the use of external limit switches. Shafting allows for the mechanical synchronization of dual spindles.

Load and Speed

	CODE	Torque Load (Nm)	Self Locking Force (Nm)	Typical Current (A)		Typical Speed (RPM±5%)		Hall Sensor Output		
				No Load 24V DC	With Load 24V DC	No Load 24V DC	With Load 24V DC	Magnet Poles	Period (ms)	
									No Load 24V DC	With Load 24V DC
Motor Speed (3800RPM)	A	4.6	1.7	1.0	3.2	130	61	2	11.1 - 12.2	24.1 - 26.7
	C	2.3	0.2	1.0	3.2	259	121			
Motor Speed (2200RPM)	B	3.7	1.7	0.5	1.6	75	26	2	18.3 - 22.0	56.2 - 62.2
	D	1.8	0.2	0.5	1.6	151	52			

NOTE

- 1 Please refer to the approved drawing for the final authentic value.
- 2 The current & speed in table and diagram are tested with TiMOTION control boxes, and there will be around 10% tolerance depending on different \ models of the control box. (Under no load condition, the voltage is around 32V DC. At rated load, the voltage output will be around 24V DC)

Standard Dimension (mm)

TL18

series

TiMOTION's TL18 series electric lifting columns are designed for industrial applications like electric height adjustable workstations and screen or lifting tables. The TL18 features an extruded aluminum rectangular appearance. Our high capacity, yet economical, TL18 provides stable vertical lifting. This streamlines the engineering design process and replaces the older style, unsafe lifting mechanisms which have many moving stages and pinch points.

Load and Speed

	CODE	Load (N) Push	Bending Moment-X Direction (Nm)		Self Locking Force (N)	Typical Current (A)		Typical Speed (mm/s)

3 = Top side cable

3 = Top side cable
Y cable, for TH + TP

Connector

1 = DIN 6P, 90° plug

E = Molex 8P, plug

C = Y cable, for direct cut system

For TH: Long DIN 5P, 180°
socket (with anti pull clip)
For TP: Long DIN 5P, 180°
plug (with O ring)

TL18 AC series

TiMOTION's TL18AC electric lifting column is designed for industrial applications such as height adjustable workstations, screen and lifting tables. The TL18AC features an extruded aluminum rectangular appearance. It is equipped with AC plug to connect the computers, TV or other device directly.

Load and Speed

	CODE	Load (N) Push	Bending Moment-X Direction (Nm)		Self Locking Force (N)	Typical Current (A)		Typical Speed (mm/s)	
			Dynamic	Static		No Load 24V DC	With Load 24V DC	No Load 24V DC	With Load 24V DC
Motor Speed (3800RPM)	U	4500	250	500	4500	2.5	4.9	11.4	6.6
	Z	3000	250	500	3000	2.5	5.5	17.1	9.5
	W	2000	250	500	2000	2.5	4.8	22.9	13.1
	S	1500	250	500	1500	2.5	4.7	30.0	18.9
	V	500	250	500	500	2.5	4.0	45.0	28.0

NOTE

- 1 Parameters above are from tested average, please refer to approval drawing for final value.
- 2 With a 12V motor, the current is approximately twice the current measured in 24V; speed will be similar for both voltages.
- 3 Y direction= X*0.8
- 3 Please refer to the approved drawing for the final authentic value.

Standard Dimension (mm)

General Features

Maximum load	4,500N in push
Maximum dynamic bending moment	250Nm
Maximum static bending moment	500Nm
Maximum speed at full load	28mm/s (with 500N in a push condition)
Minimum installation dimension	\geq Stroke + 183mm
Stroke	200~700mm
Operational temperature range	+5°C~+45°C
Options	AC cable exit from top end, top side; Ethernet socket

Performance Data

Motor Speed 3800RPM

Speed vs. Thrust

Current vs. Thrust

TL18AC Ordering Key

TL18AC

Version: 20180120-B

Voltage	U = 100-240VAC, SMPS		
Load and Speed	See page 127		
Stroke (mm)	200~700		
Restracted Lenght (mm)	See page 131		
Special Functions for Spindle Sub-Assembly	0 = Without (standard)	1 = Safety nut	
Color	1 = Black	2 = Matte silver	
Tubes & Sockets Position	See page 132		
Top Plate	1 = Small plate	2 = Big plate	
Bottom Plate	1 = Small plate	2 = Big plate	
AC Input Plug & Output Socket	5 = EU	6 = US	8 = UK
AC Cable Length (mm)	5 = Straight, 1500		
AC Output Socket	0 = Without	1 = With	
Direct Cut	K = 1 motor direct cut system		L = 1+1 motor direct cut system
Internet Socket	0 = Without	1 = With	

NOTE

1 The TL18AC is designed especially for push applications, not suitable for pull applications.

TL18AC

Ordering Key Appendix

Retracted Length (mm)

1. Calculate $A+B=Y$
2. Retracted length needs to \geq Stroke+Y

A. Top Plate

	Small	Big
	1	2
1	+8	+12
2	+12	+16

B. AC Output Socket

	Top End	Top Side
	B, C	D, E
Without 0	+175	+209
With 1	+175	+229

Tube & Socket Position

B = Tube: Thinner on top
Sockets: Top end

C = Tube: Thicker on top
Sockets: Top end

D = Tube: Thinner on top
Sockets: Top side

E = Tube: Thicker on top
Sockets: Top side

Direct Cut

K = 1 Motor direct cut. Control socket - Without motor socket.
Top end or top side - AC output & control socket

L = 1+1 motor direct cut. Control socket - With motor socket.
Top end or top side - AC output & control socket

Ethernet Socket

0 = Without Ethernet socket
Top end or top side- AC output & control socket

Bottom side - AC input

1 = With Ethernet socket
Top end or top side- AC output & control socket

Bottom side - AC input

Top Plate Small

1 = Small plate - B

1 = Small plate - C

1 = Small plate - D

1 = Small plate - E

Top Plate Big

2 = Big plate - B

2 = Big plate - C

2 = Big plate - D

2 = Big plate - E

Bottom Plate Small

1 = Small plate - B

1 = Small plate - C

1 = Small plate - D

1 = Small plate - E

Bottom Plate Big

2 = Big plate - B

2 = Big plate - C

2 = Big plate - D

2 = Big plate - E

Terms of Use

The user is responsible for determining the suitability of TiMOTION products for a specific application. TiMOTION takes great care in providing accurate and up-to-date information on its products. However, due to continuous development, frequent modifications and changes to products may occur without prior notice. It is for this reason that TiMOTION cannot guarantee the correct and actual status of said information on its products, nor can it guarantee the availability of any particular product.

Therefore, TiMOTION reserves the right to discontinue the sale of any product displayed on its website or listed in its catalogues or other written material produced by TiMOTION.
