UNIMOTION

LINEAR UNITS

About Us

Our company was established in 1990 and, since then, it is privately owned. After 7 years of experience in metal processing as a contractor, the company Hypex (Unimotion) was created and operated in the following areas: special purpose machinery manufacture with its own development, trade and assembly in the area of industrial automation.

Due to many years of engineering and substantial engagement in individual problem solving processes, extensive knowledge and experience in the development and manufacture of linear and handling systems were gained. Today we produce mechanical linear units, compact linear units, multi-axis systems as well as customised solutions for high dynamic demands.

Our company's premises, which cover an area of 4500m², offer room for our 75 employees. Production, construction, administration and warehouse; all this can be found under one roof.

Our modern machinery with CNC machining centres and CNC automatic lathes enables high-precision manufacture and really high in-house production depth. For example, we ourselves manufacture shaft drives with tooth washers and our screw ends. This is why, quality, reliability, a good price/performance ratio and short delivery times are harmonised to perfection.

Thus, in the production of our standard linear units as well as individual and complex special linear units, we can guarantee high capacity, flexibility and precision.

At the moment, we export our products in more than 30 countries. Inspired by our customers' demands, Hypex (Unimotion) constantly develops new products and system solutions. So you are welcome to contact us. We look forward to meet you and work on your special project!

Unimotion products have the quality and standards to meet the requirements of the modern market.

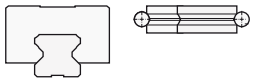
DRIVE

GUIDE

MTJ MRJ



FEATURES

- High speed
- High acceleration
- Large stroke lenghts
- Good repeatability

Linear Unit	Dynamic load capacity		Max. travel speed	[1] Max. profile length	Max. repeatability	Dimensions	
	Cy [N]	Cz [N]	[m/s]	[mm]	[mm]	[2] Width [mm]	[3] Height [mm]
MTJ 40	4610		6	3000	± 0,08	40	52
MTJ 65 S	9900		6	6000	± 0,08	65	85
MTJ 65 L	19800		6	6000	± 0,08	65	85
MTJ 80 S	17100		6	6000	± 0,08	80	100
MTJ 80 L	34200		6	6000	± 0,08	80	100
MTJ 110 S	24800		6	6000	± 0,08	110	129
MTJ 110 L	49600		6	6000	± 0,08	110	129
MRJ 40	3400	1700	10	6000	± 0,08	40	52
MRJ 65 L	8600	4400	10	6000	± 0,08	65	85
MRJ 80 L	17100	9000	10	6000	± 0,08	80	100
MRJ 110 L	31000	14000	10	6000	± 0,08	110	129

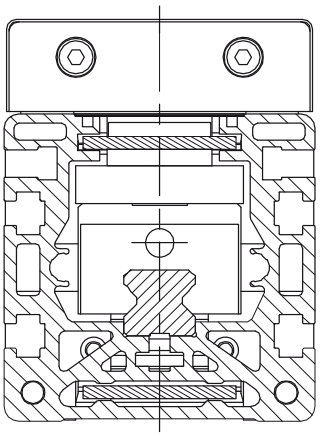
MTJ / MRJ

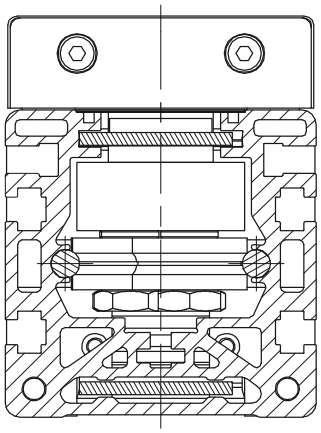
CHARACTERISTICS

MTJ and **MRJ** Linear Units with toothed belt drive and compact dimensions provide high performance features such as, high speed, good accuracy and repeatability.
They can easily be combined to multi-axis systems.
Excellent price-/performance ratio and quick delivery time are ensured.
The compact, precision-extruded aluminum Profile from 6063 AL with integrated Zero-backlash Ball rail guide system, allows high load capacities and optimal cycles for the movement of larger masses at high speed.
For very high speeds, up to 10m/s, the Track Rollers (journal Bearings) of the type MRJ are particularly suitable.
In the Linear Units MTJ and MRJ is used a pre-tensioned steel reinforced AT polyurethane timing toothed belt. In conjunction with a Zero-backlash drive pulley high moments with alternating loads with good positioning accuracy, low wear and low noise can be realized.
The in the Profile slot driving Polyurethane timing belt protects all the parts in the Profile from dust and other contaminations. As optional, a corrosion-resistant protection strip is available.
The aluminum profile includes T-slots for fixing the Linear Unit and for attaching sensors and switches. Also, a Reed switch can be used here.
Different carriage lengths with central lubrication port, allow easy re-lubrication of the Linear Unit and allow the possibility to attach additional accessories on the side.
For the Linear Units MTJ and MRJ various adaptation options, for attaching (or redirecting), for Motors or Gearboxes are available.

MTJ



MRJ



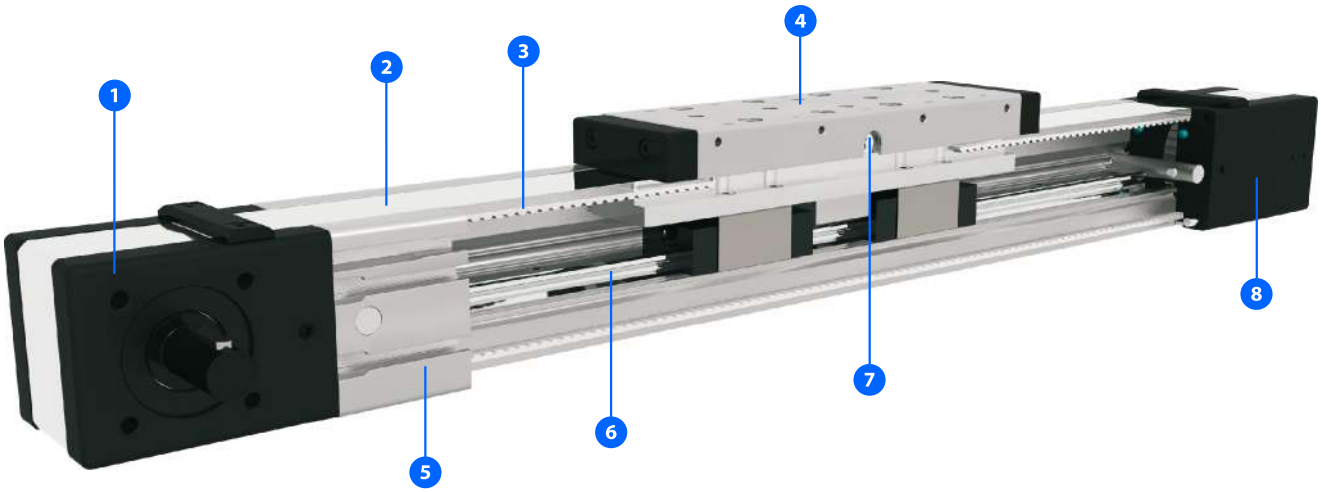
The aluminium profiles are manufactured according to the medium EN 12020-2 standard

Straightness = 0,35 mm/m; Max. torsion = 0,35 mm/m; Angular torsion = 0,2 mm/40 mm; Parallelism = 0,2 mm

In order to improve the products in this catalogue the specifications are subject to change without notice.

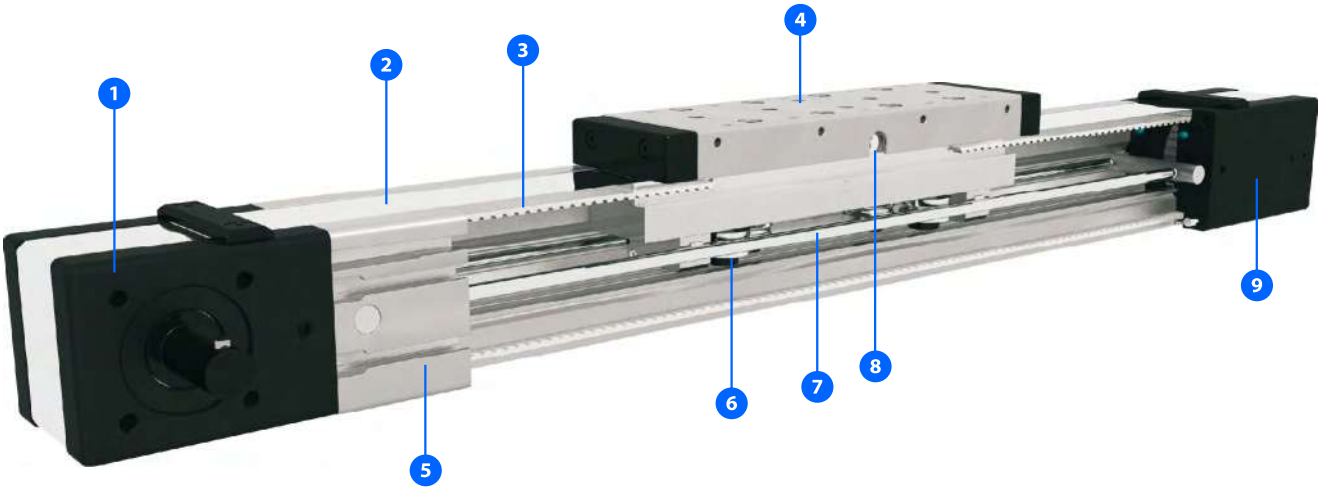
STRUCTURAL DESIGN

MTJ Series



1 - Drive block with pulley
2 - Corrosion-resistant protection strip (available also without protection strip)
3 - AT polyurethane toothed belt with steel tension cords
4 - Carriage; with built in Magnets
5 - Aluminium profile-Hard anodized
6 - Linear Ball Guideway
7 - Central lubrication port; both sides
8 - Tension End with integrated belt tensioning system

MRJ Series



1 - Drive block with pulley
2 - Corrosion-resistant protection strip (available also without protection strip)
3 - AT polyurethane toothed belt with steel tension cords
4 - Carriage; with build in Magnets
5 - Aluminium profile-Hard anodized
6 - Track Roller (journal Bearing)
7 - Two hardened steel Round guide (58/60 HRC)
8 - Central lubrication port; both sides
9 - Tension End with integrated belt tensioning system

HOW TO ORDER

Series :

MRJ

MTJ

Size :

40

65

80

110

Absolute stroke [mm] :
(Absolute stroke = Effective stroke + 2 x Safety stroke)

Carriage Version :

S : Short (only for MTJ series)

L : Long

Leave blank : For MRJ 40, MTJ 40

Number of carriages :

The stated number specifies the number of carriages on one Linear unit (up to 5 carriages avaliable)

Leave blank : For the case of one carriage

Distance between two carriages [mm] :

Leave blank : For the case of one carriage

Type of drive pulley :

0 : Pulley with through hole

1 : Pulley with journal (with Keyway)

10 : Pulley with journal (without Keyway)

2 : Pulley with journal on both sides (with Keyway)

20 : Pulley with journal on both sides (without Keyway)

3 : Without drive unit

Drive journal position :

L : Journal on left side

R : Journal on right side

Leave blank : For type of drive pulley 0, 2, 20 and 3

Protection cover :

0 : In profile groove guided Polyurethane toothed belt

1 : Corrosion-resistant protection strip

In order to improve the products in this catalogue the specifications are subject to change without notice.

TECHNICAL DATA

General technical data

Linear Unit	Carriage length	Dynamic load capacity			Dynamic moment			Max. permissible loads					Moved mass	Max. Repeatability	* Max. length	* Max. stroke	** Min. stroke
								Forces		Moments							
	Lv [mm]	C [N]	Cy [N]	Cz [N]	Mx [Nm]	My [Nm]	Mz [Nm]	Fpy [N]	Fpz [N]	Mpx [Nm]	Mpy [Nm]	Mpz [Nm]	[kg]	[mm]	Lmax [mm]	[mm]	[mm]
MTJ 40	92	4610	/	/	28	90	90	3850	3850	14	75	75	0,28	± 0,08	3000	2876	25
MRJ 40	92	/	3400	1700	20	21	25	1015	1090	13	14	7,6	0,26	± 0,08	6000	5876	0

*For lengths / stroke over the stated value in the table above please contact us.
Values for max. stroke are not valid for multiple carriages
(equation of defining the linear unit length for particular size of the linear unit needs to be used).

**For minimum stroke below the stated value in the table above please contact us.

Operating conditions	
Operating temp.	0°C ~ +60°C
Duty cycle	100%

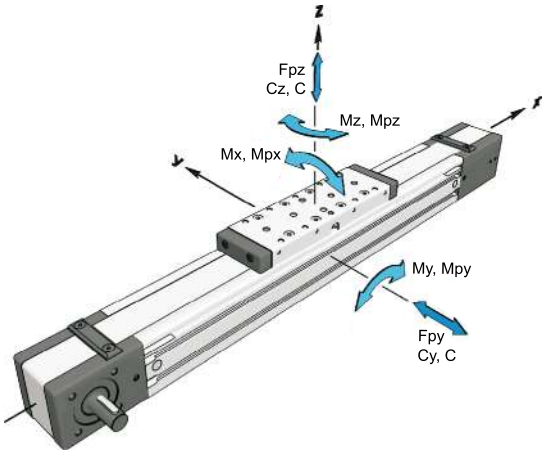
For operating temperature out of the presented range, please contact us.

Recommended values of loads

All the data of dynamic moments and load capacities stated in the upper table are theoretical without considering any safety factor. The safety factor depends on the application and its requested safety. We recommend a minimum safety factor (fs =5.0)

Modulus of elasticity :

E = 70000 N / mm^2

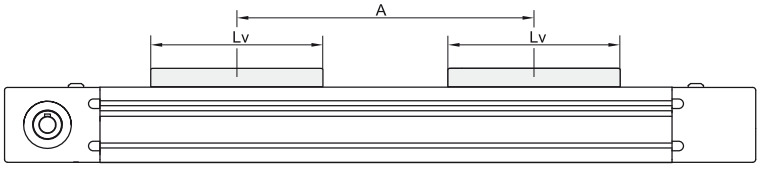


General technical data for double carriage

Linear Unit	Carriage version	Dynamic load capacity			* Dynamic moment			* Max. permissible loads				
								Forces		Moments		
		C [N]	Cy [N]	Cz [N]	Mx [Nm]	My [Nm]	Mz [Nm]	Fpy [N]	Fpz [N]	Mpx [Nm]	Mpy [Nm]	Mpz [Nm]
MTJ 40	2	9220	/	/	57	4,6 × A	4,6 × A	7690	7690	28	3,8 × A	3,8 × A
MRJ 40	2	/	6800	3400	40	1,7 × A	3,4 × A	2030	2180	26	1,1 × A	1,0 × A

*A - Distance between carriages [mm]. More info on following pages.

Presented values are for informational purposes only. Exact values can be calculated using our sizing selection tool on Unimotion web site.



Drive and belt data

Linear Unit	* Max. travel speed	Max. drive torque	** No load torque		Puley drive ratio	Pulley diameter	Belt type	Belt width	Max. force transmited by belt	Specific spring constant	* Max. acceleration
		Ma	With strip	Without strip						Cspec	
	[m / s]	[Nm]	[Nm]	[Nm]	[mm / rev]	[mm]		[mm]	[N]	[N]	[m/s^2]
MTJ 40	6	3,7	0,4 × nc	0,2 × nc	99	31,51	AT 3	20	235	225000	70
MRJ 40	10		0,4 × nc	0,2 × nc							

*Max. travel speed and max. acceleration of Linear unit with the Corrosion-resistant protection strip is 1,5 m/s and 50 m/s^2, respectively.
For travel speed and acceleration over the stated value in the table above please contact us.

**The stated values are for strokes (and for distances between the carriages A) up to 500mm. No Load Torque value increases with stroke (and with A) elongation.

TECHNICAL DATA

Mass and mass moment of inertia

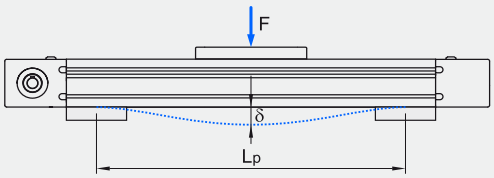
Linear Unit	* Mass of linear unit [kg]	* Mass moment of inertia [10^{-5} kg m^2]	Planar moment of inertia Iy [cm^4]	Iz [cm^4]
MTJ 40	1,3 + 0,0024 × (Abs. stroke + (nc - 1) × A) + 0,28 × (nc - 1)	9,7 + 0,0035 × (Abs. stroke + (nc - 1) × A) + 7,0 × (nc - 1)	9,8	11,6
MRJ 40	1,25 + 0,0022 × (Abs. stroke + (nc - 1) × A) + 0,26 × (nc - 1)	9,3 + 0,0035 × (Abs. stroke + (nc - 1) × A) + 6,5 × (nc - 1)		

*Absolute stroke [mm]
A - Distance between carriages [mm]. More info on following pages.
nc - Number of carriages

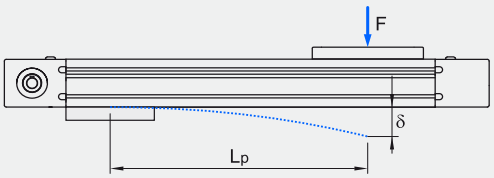
Mass calculation doesn´t include mass of motor, reduction gear, switches and clamps.

Deflection of the linear unit

Fixed - fixed mounting



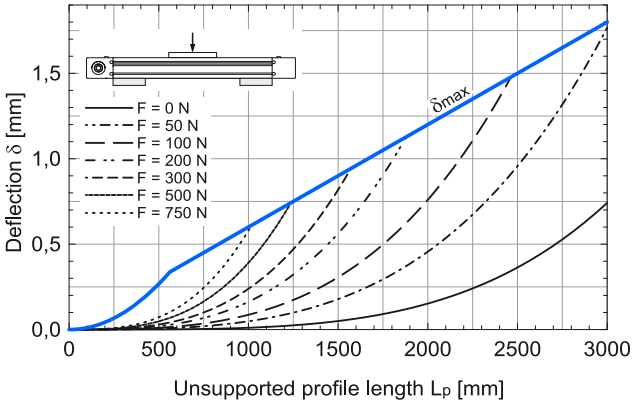
Fixed - free mounting

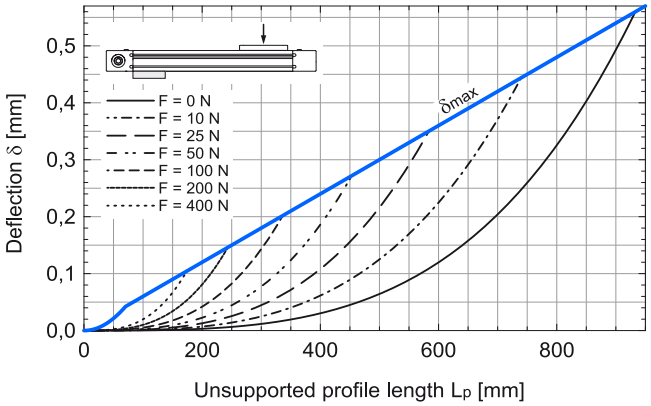


δ Maximum deflection of the linear unit [mm]
δmax Maximum permissible deflection of the linear unit [mm]
F Applied force [N]
Lp Unsupported profile length [mm]

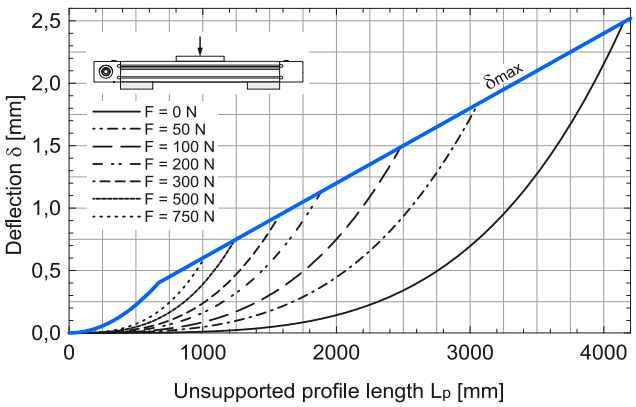
The maximum permissible deflection δmax must not be exceeded. In the case that maximum deflection δ exceeds the maximum permissible deflection δmax additional profile supports are needed.

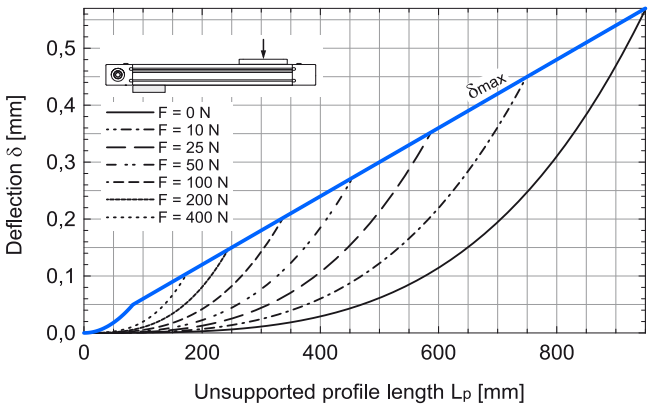
MTJ 40





MRJ 40

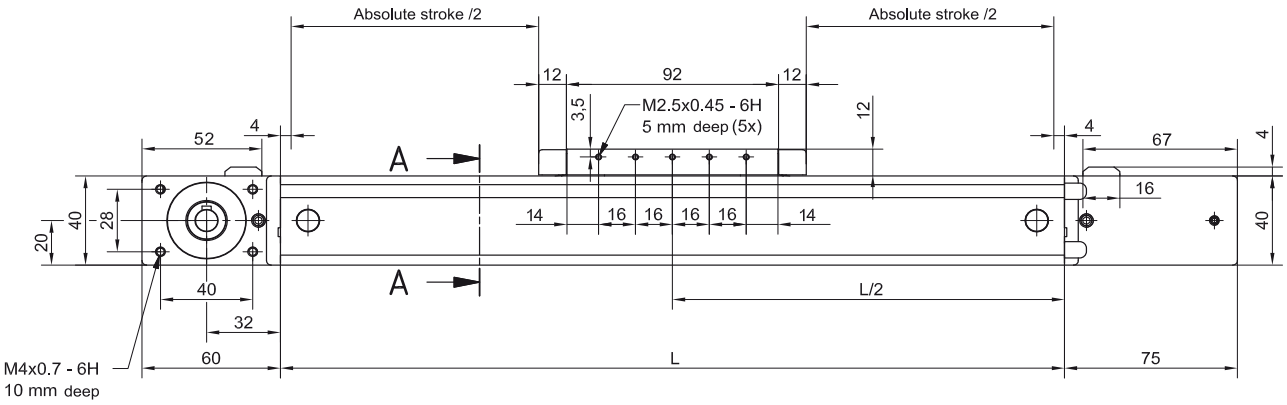




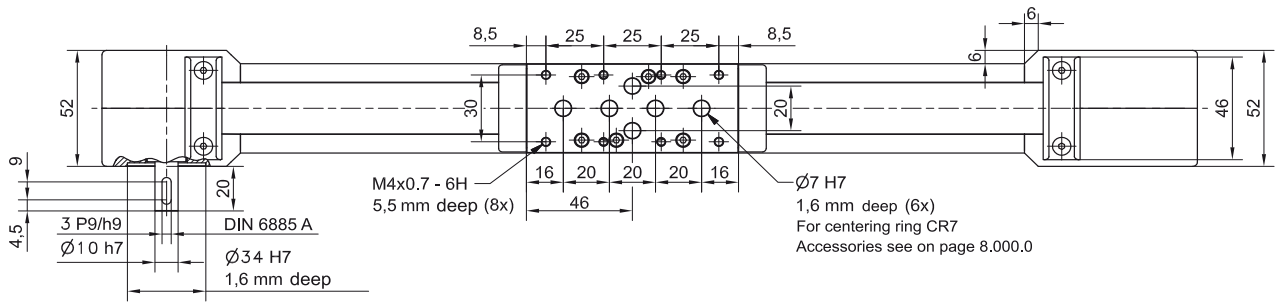
In order to improve the products in this catalogue the specifications are subject to change without notice.

DIMENSIONS

Linear Unit doesn't include any safety stroke.
Absolute stroke = Effective stroke + 2 x Safety stroke



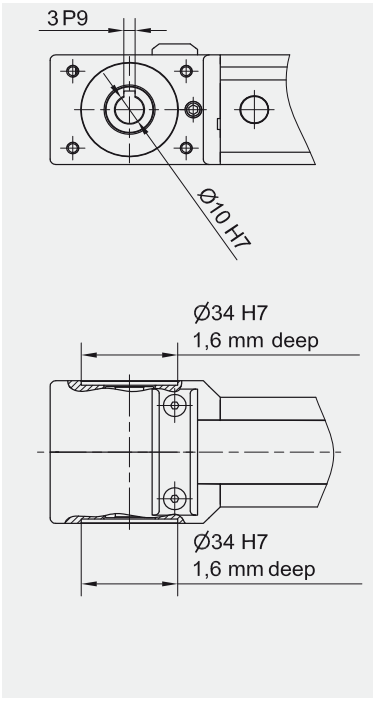
Lifetime lubricated!



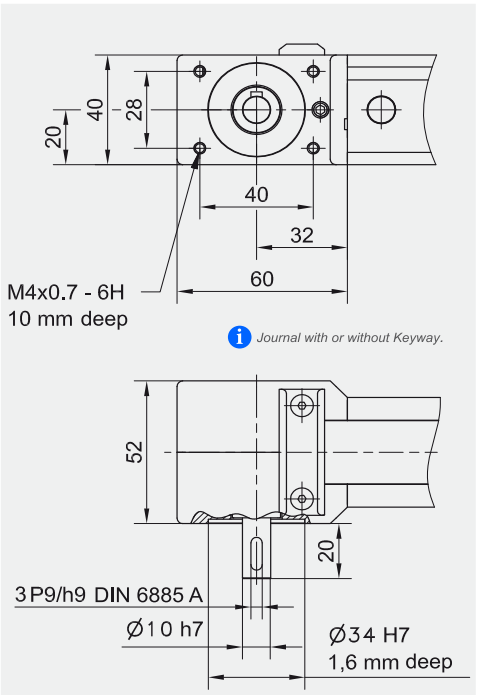
Journal with or without Keyway.

All dimensions in mm; Drawings scales are not equal.

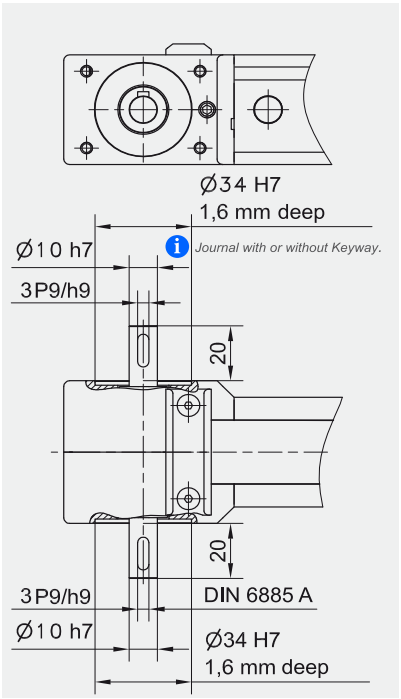
TYPE 0



TYPE 1 L and 1 R

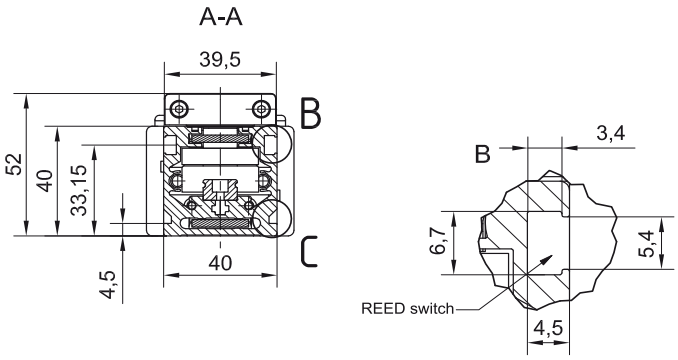


TYPE 2

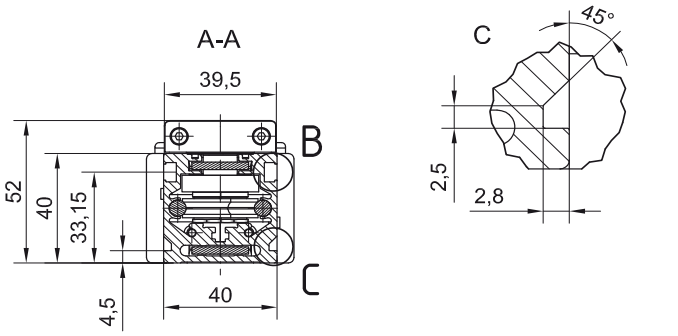


DIMENSIONS

MTJ 40

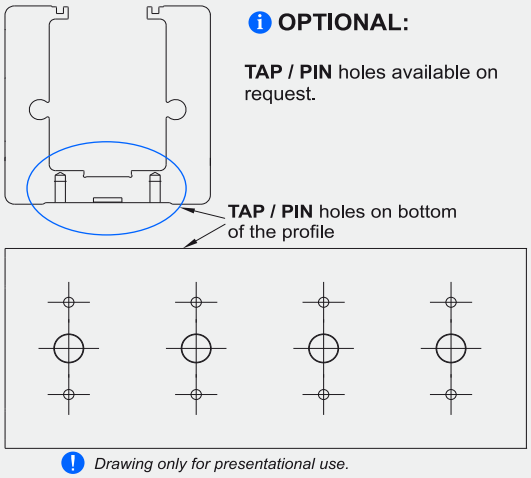


MRJ 40



OPTIONAL:

TAP / PIN holes available on request.



Drawing only for presentational use.

All dimensions in mm; Drawings scales are not equal.

Mounting the drive

- by the **MOTOR ADAPTER WITH COUPLING** *(Page 8.020.0)*

Available on request.

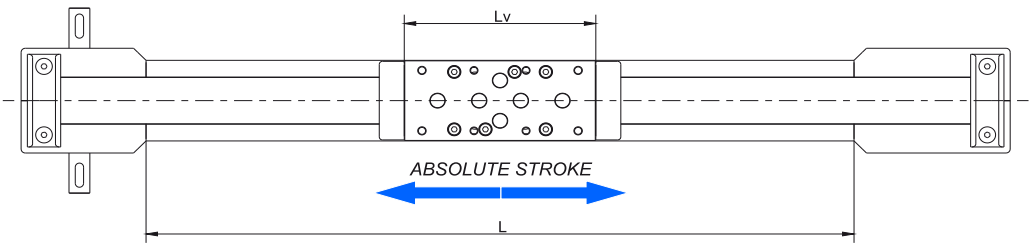
Defining of the linear unit length

L = Effective stroke + 2 × Safety stroke + Lv + 32 mm

Lv = 92 mm

Ltotal = L + 135 mm

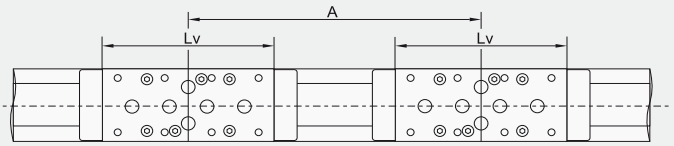
Left side (L)



Right side (R)

Multiple carriages

Carriages are connected inside the profile with an aluminium plate (or a toothed belt for the case of longer distances A)



L = Effective stroke + 2 × Safety stroke + Lv + A × (nc - 1) + 32 mm

Ltotal = L + 135 mm

A ≥ Lv + 24 mm

nc - Number of carriages

For the case of A [mm] > Alim :

- a toothed belt for the connection of the carriages will be used,
- the following condition must be met:

A [mm] = Alim + 3 × i,

where i ∈ {1,2,3,...}.

	MTJ / MRJ 40
Alim [mm]	401,5

In order to improve the products in this catalogue the specifications are subject to change without notice.

MRJ 80 L	10		1,4 × nc	1,1 × nc							

*Max. travel speed and max. acceleration of Linear unit with the Corrosion-resistant protection strip is 1,5 m/s and 50 m/s^2 respectively.
For travel speed and acceleration over the stated value in the table above please contact us.

**The stated values are for strokes (and for distances between the carriages A) up to 500mm. No Load Torque value increases with stroke (and with A) elongation.
nc - Number of carriages

TECHNICAL DATA

Mass and mass moment of inertia

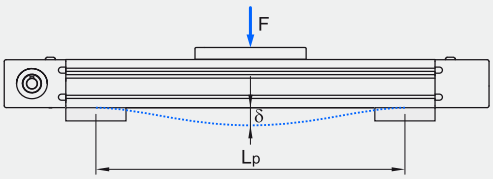
Linear Unit	* Mass of linear unit [kg]	* Mass moment of inertia [10^{-5} kg m^2]	Planar moment of inertia Iy [cm^4]	Iz [cm^4]
MTJ 80 S	6,8 + 0,0085 × (Abs. stroke + (nc - 1) × A) + 1,72 × (nc - 1)	310,6 + 0,0391 × (Abs. stroke + (nc - 1) × A) + 192,1 × (nc - 1)	129,1	173,4
MTJ 80 L	8,4 + 0,0085 × (Abs. stroke + (nc - 1) × A) + 2,72 × (nc - 1)	423,3 + 0,0391 × (Abs. stroke + (nc - 1) × A) + 303,8 × (nc - 1)		
MRJ 80 L	8,2 + 0,0075 × (Abs. stroke + (nc - 1) × A) + 2,73 × (nc - 1)	424,4 + 0,0391 × (Abs. stroke + (nc - 1) × A) + 304,9 × (nc - 1)		

*Absolute stroke [mm]
A - Distance between carriages [mm]. More info on following pages.
nc - Number of carriages

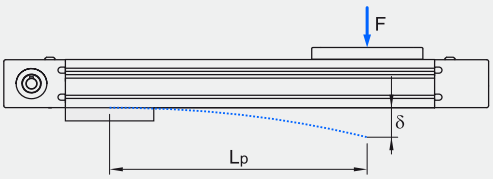
Mass calculation doesn´t include mass of motor, reduction gear, switches and clamps.

Deflection of the linear unit

Fixed - fixed mounting



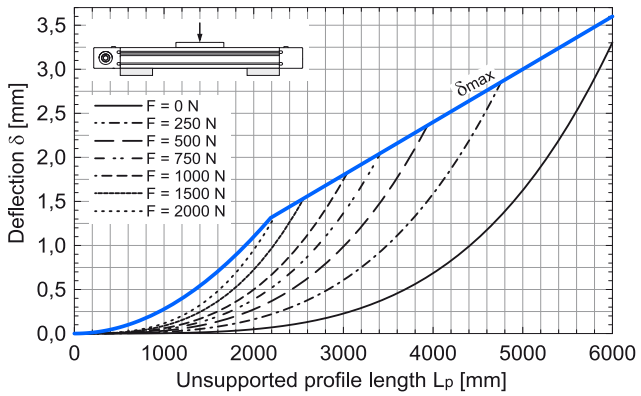
Fixed - free mounting

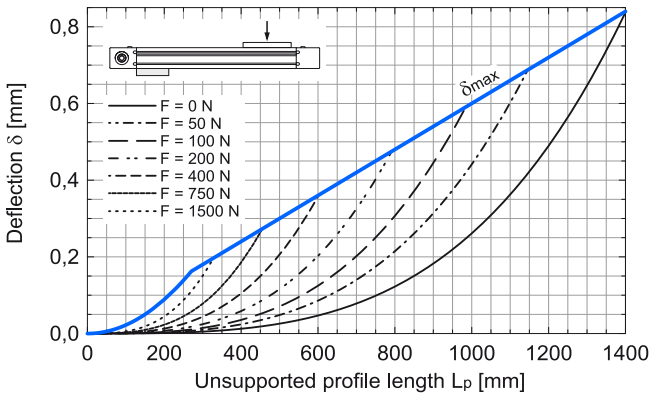


δ Maximum deflection of the linear unit [mm]
δmax Maximum permissible deflection of the linear unit [mm]
F Applied force [N]
Lp Unsupported profile length [mm]

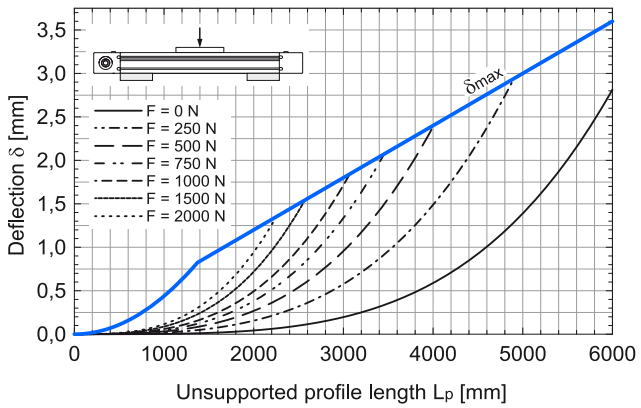
The maximum permissible deflection δmax must not be exceeded. In the case that maximum deflection δ exceeds the maximum permissible deflection δmax additional profile supports are needed.

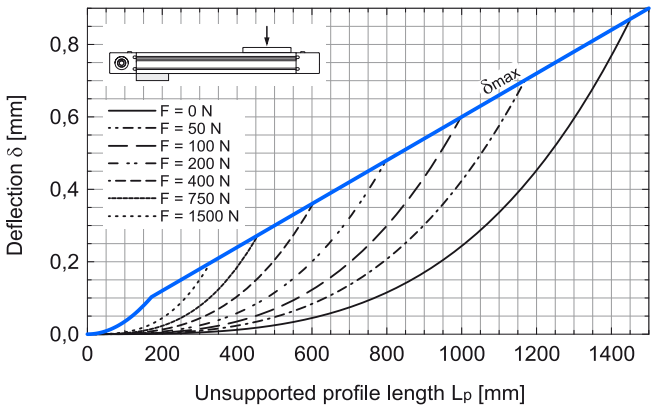
MTJ 80





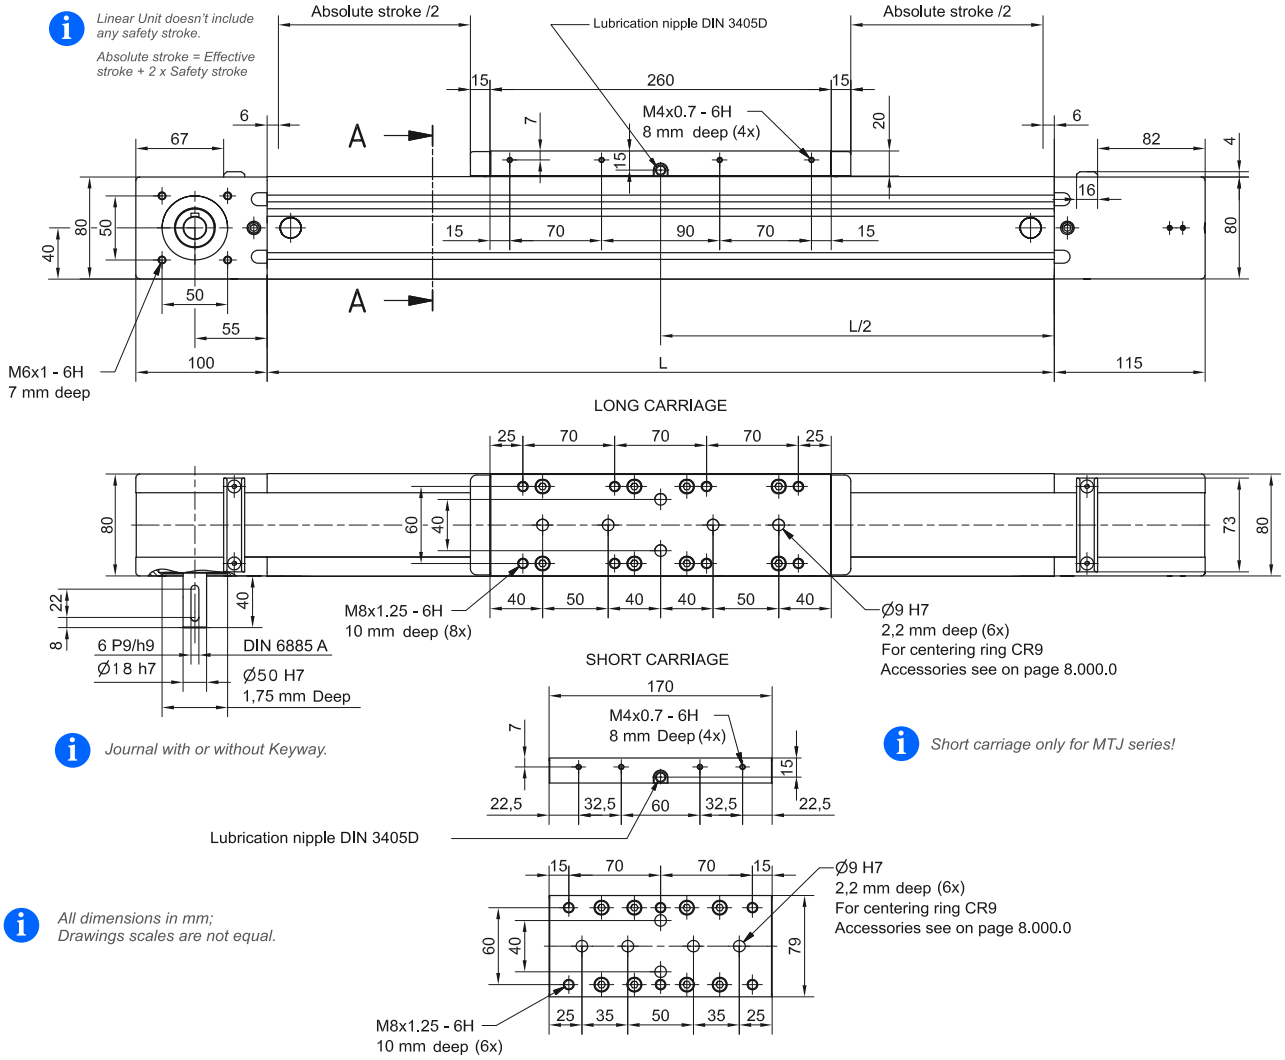
MRJ 80



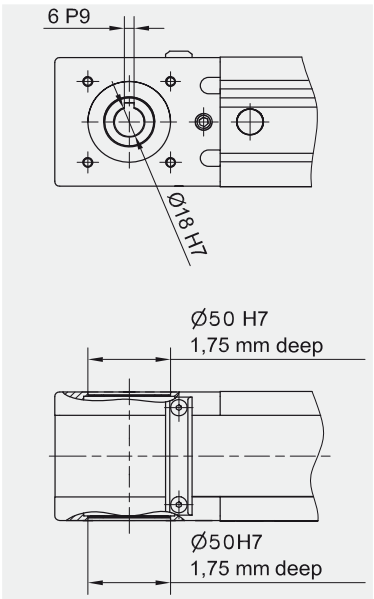


In order to improve the products in this catalogue the specifications are subject to change without notice.

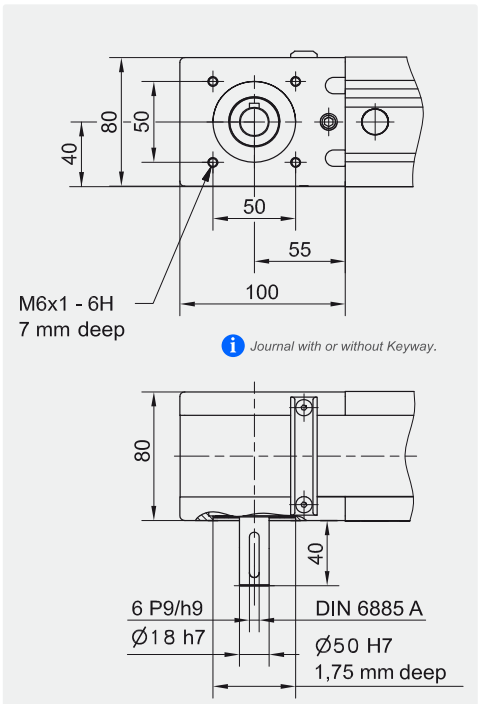
DIMENSIONS



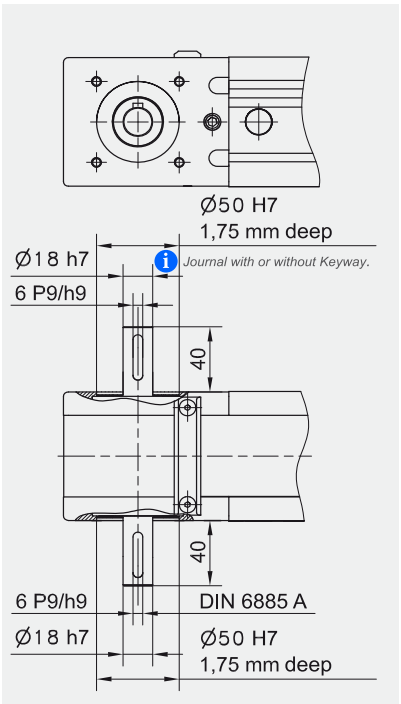
TYPE 0



TYPE 1 L and 1 R

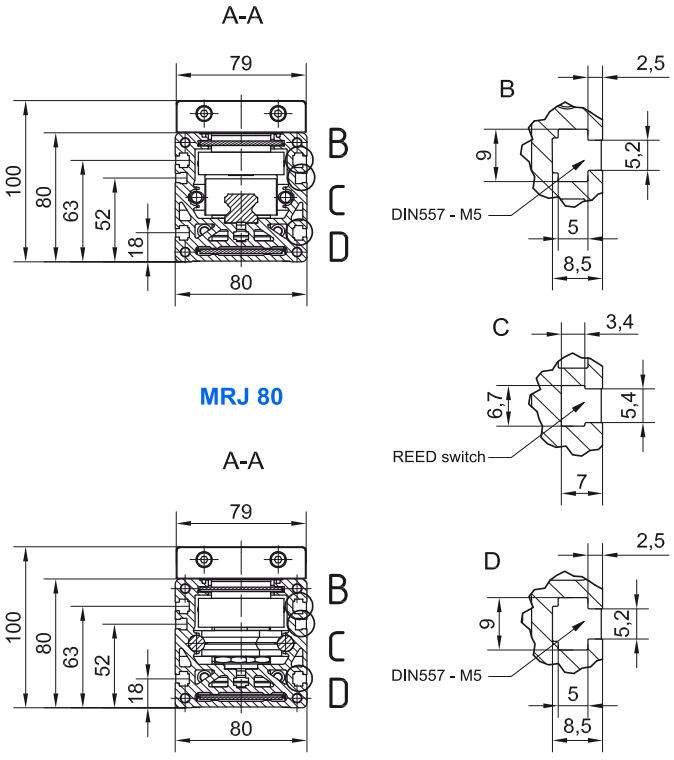


TYPE 2



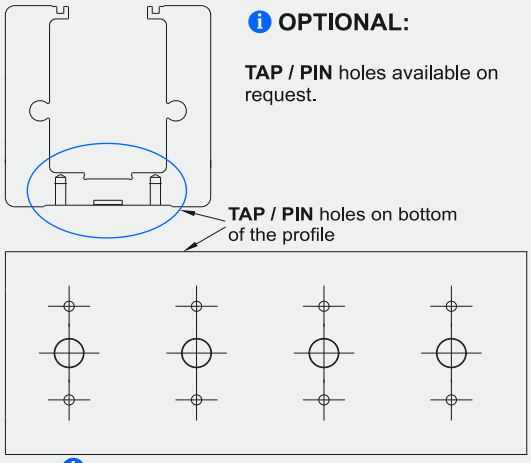
DIMENSIONS

MTJ 80



MRJ 80

All dimensions in mm; Drawings scales are not equal.



Drawing only for presentational use.

Mounting the drive

- by the **MOTOR ADAPTER WITH COUPLING** *(Page 8.020.0)*

Available on request.

Defining of the linear unit length

L = Effective stroke + 2 × Safety stroke + Lv + 42 mm

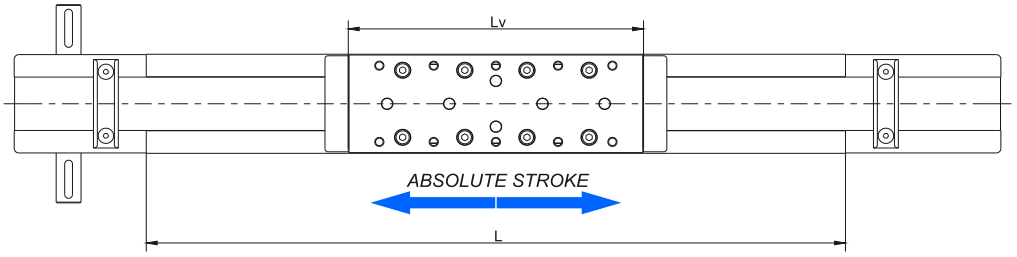
Ltotal = L + 215 mm

Lv - Long carriage = 260 mm

Lv - Short carriage = 170 mm

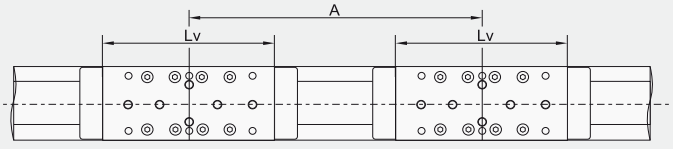
Left side (L)

Right side (R)



Multiple carriages

Carriages are connected inside the profile with an aluminium plate (or a toothed belt for the case of longer distances A)



L = Effective stroke + 2 × Safety stroke + Lv + A × (nc - 1) + 42 mm

Ltotal = L + 215 mm

A ≥ Lv + 30 mm

For the case of A [mm] > Alim :

- a toothed belt for the connection of the carriages will be used,
- the following condition must be met:

A [mm] = Alim + 5 × i,

where i ∈ {1,2,3,...}.

	MTJ 80 S	MTJ / MRJ 80 L
Alim [mm]	711,5	801,5

In order to improve the products in this catalogue the specifications are subject to change without notice.

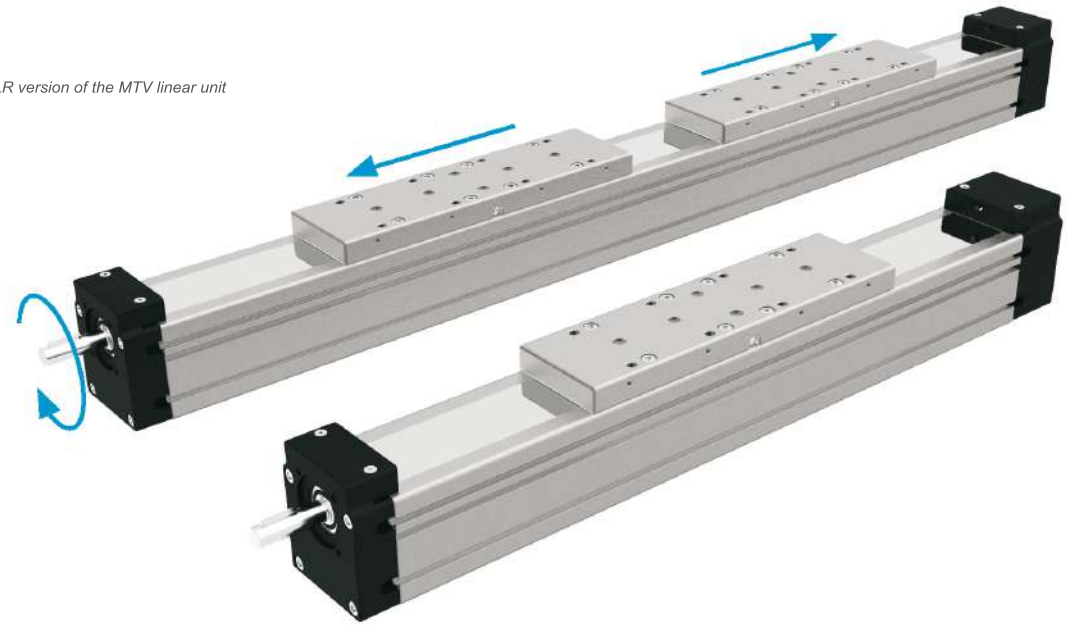
MTV

CHARACTERISTICS

The **MTV** series describes Linear Units with precision ball screw drive, integrated guide rail and compact dimensions. They provide high performances features, such as high speeds, good accuracy and repeatability.
They can easily be combined to multi-axis systems.
Excellent price-/performance ratio and quick delivery time are ensured.
The compact, precision-extruded aluminum Profile from 6063 AL with integrated Zero-backlash Ball rail guide system, allows high load capacities and optimal cycles for the movement of larger masses at high speed.
In the Linear Units MTV a precision ball screw, with tolerance class ISO7 (ISO5 on request), with reduced backlash of the ball nut is used.
A corrosion-resistant protection strip, protects all the parts in the profile from dust and other contaminants.
The aluminum profile includes T-slots for fixing the Linear Unit and for attaching sensors and switches. Also, a Reed switch can be used here.
The carriage, with central lubrication port, allows easy central re-lubrication of ball screw and Ball rail guide and provides the possibility to attach additional accessories on the side.
For the Linear Units MTV various adaptation options, for attaching (or redirecting), for Motors or Gearboxes are available.
To achieve higher speeds at the same stroke of the linear unit, the ball screw support system can be integrated. With this feature vibrations and deflections of the ball screw are reduced, therefore longer strokes are possible. The linear unit with integrated support system can have a higher axial load capacity.
Ball screw supports are made out of high quality plastic materials with high wear resistance properties.
Our system enables ball screw support in horizontal or vertical positioning of the linear unit.

A 2LR version of MTV linear unit is available, where two carriages are moving simultaneously in opposite directions. Both right and left handed precision ball screws are used, which are rigidly connected. The ball screw support system can also be integrated.

2LR version of the MTV linear unit



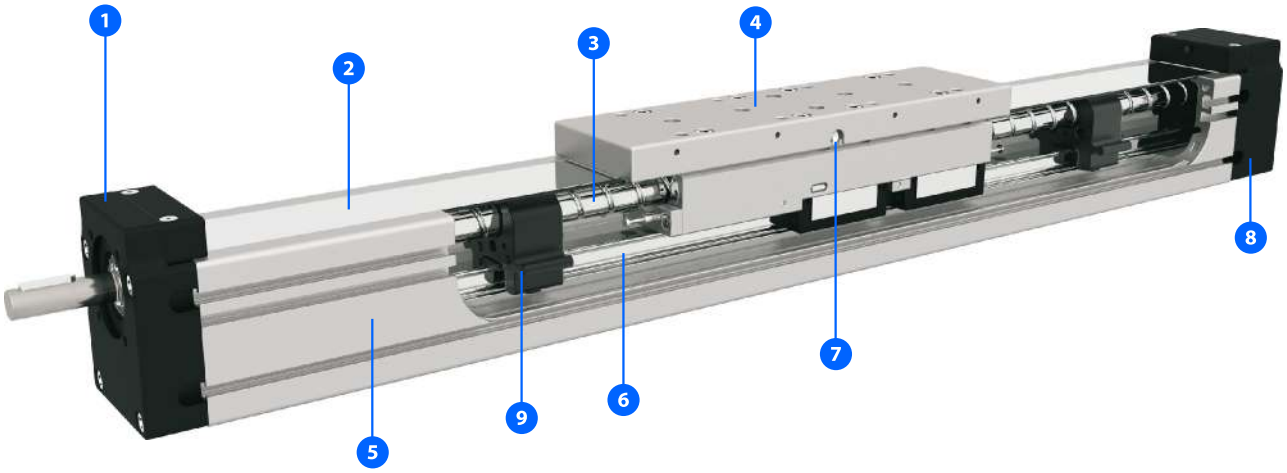
The aluminium profiles are manufactured according to the medium EN 12020-2 standard

Straightness = 0,35 mm/m; Max. torsion = 0,35 mm/m; Angular torsion = 0,2 mm/40 mm; Parallelism = 0,2 mm

In order to improve the products in this catalogue the specifications are subject to change without notice.

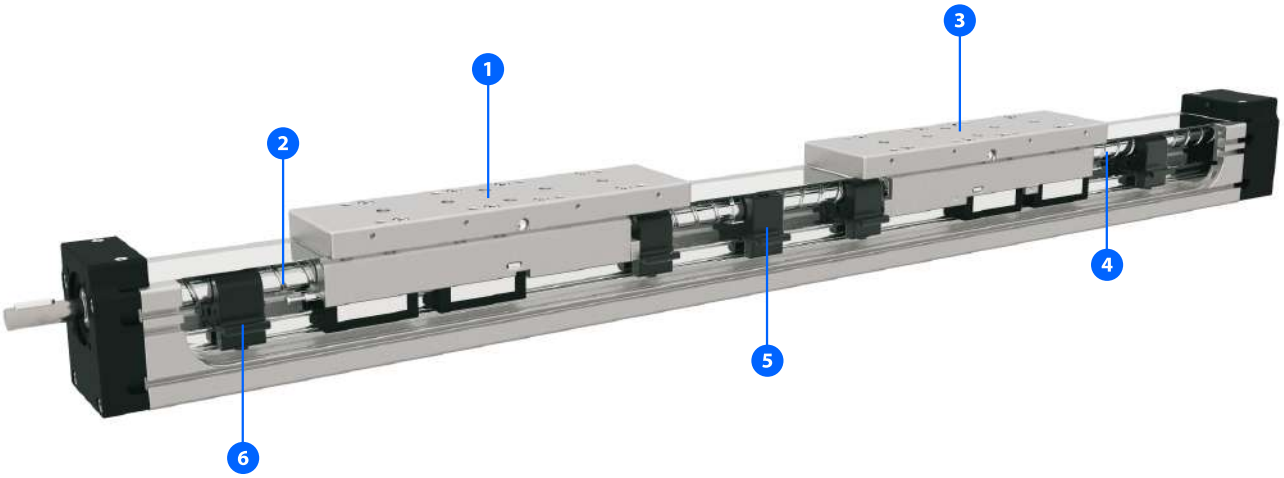
STRUCTURAL DESIGN

Standard version



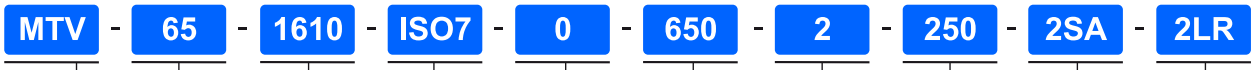
1 - Drive block with floating bearing (MTV 110 - fixed bearing)
2 - Corrosion-resistant protection strip
3 - Ball screw tolerance ISO7 (ISO5 available on request)
4 - Carriage; with built in Magnets
5 - Aluminium profile-Hard anodized
6 - Integrated Linear Ball Guideway
7 - Central lubrication port; both sides
8 - End block with fixed bearing (MTV 110 - floating bearing)
9 - Screw support - SA

2LR version



1 - Carriage; with build in right hand ball nut
2 - Right hand ball screw
3 - Carriage; with build in left hand ball nut
4 - Left hand ball screw
5 - Central screw support - fixed
6 - Screw support - SA

HOW TO ORDER



Series :

MTV

Size :

40

65

80

110

Ball screw :

MTV 40: Ø12×5, Ø12×10

MTV 65: Ø16×5, Ø16×10, Ø16×16

MTV 80: Ø20×5, Ø20×10, Ø20×20, Ø20×50

MTV 110: Ø32×5, Ø32×10, Ø32×20, Ø32×32

Ball screw tolerance :

ISO7 (Standard)

ISO5

Ball screw journal :

0 : Without keyway

1 : With keyway

*MTV 40 only available without keyway - **0***

Absolute stroke [mm] :
(Absolute stroke = Effective stroke + 2 x Safety stroke)

2LR version: Absolute stroke of one carriage

Number of carriages :

The stated number specifies the number of carriages on one Linear unit (up to 5 carriages avaliable)

Leave blank : For the case of one carriage

Connection between the carriages must be provided by the customer

Distance between two carriages [mm] :

Leave blank : For the case of one carriage

Number of screw supports n_{SA} :
(only even integer number - 2, 4, 6, 8, 10SA) - for MTV 40 and 65 max. 4SA is available

Leave blank : Without SA

2LR version :
Both right and left ball screws are used.

Leave blank : Standard version

Available for: MTV65: 16x5, 16x10
MTV80: 20x5

In order to improve the products in this catalogue the specifications are subject to change without notice.

*Absolute stroke [mm]
A - Distance between carriages [mm]. More info on following pages.
nc - Number of carriages

**The stated values are for strokes (and for distances between the carriages A) up to 500mm.
No Load Torque value increases with stroke (and with A) elongation.

Mass calculation doesn´t include mass of motor, reduction gear, switches and clamps.

Planar moment of inertia

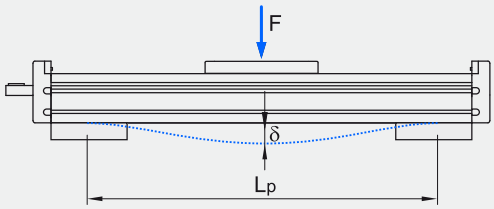
Linear Unit	Planar moment of inertia	
	I_y [cm^4]	I_z [cm^4]
MTV 65 MTV 65 2LR	71,3	89,4

In order to improve the products in this catalogue the specifications are subject to change without notice.

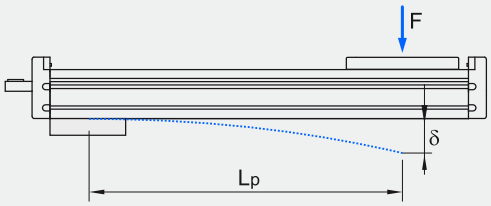
TECHNICAL DATA

Deflection of the linear unit

Fixed - fixed mounting



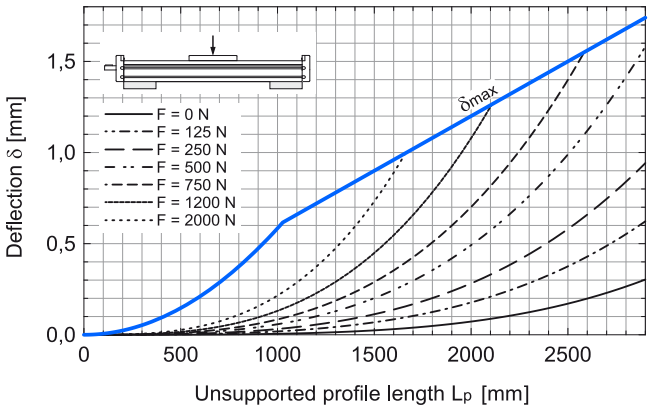
Fixed - free mounting

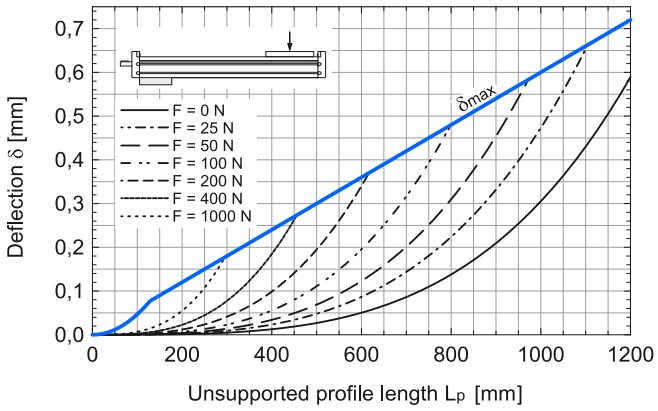


δ Maximum deflection of the linear unit [mm]
δmax Maximum permissible deflection of the linear unit [mm]
F Applied force [N]
Lp Unsupported profile length [mm]

The maximum permissible deflection δmax must not be exceeded. In the case that maximum deflection δ exceeds the maximum permissible deflection δmax additional profile supports are needed.

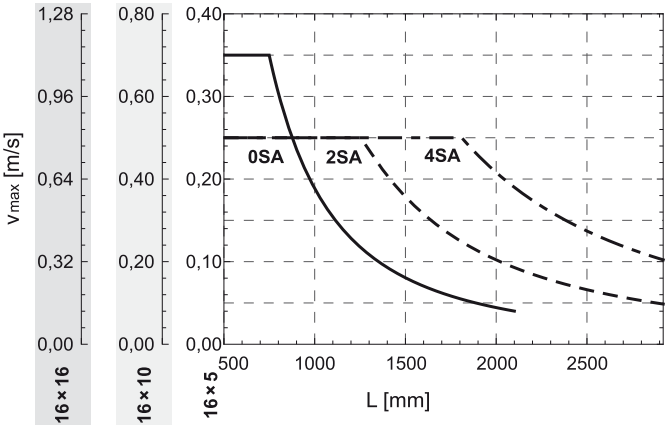
MTV 65





Maximum travel speed as a function of the profile length (Vmax - L curves)

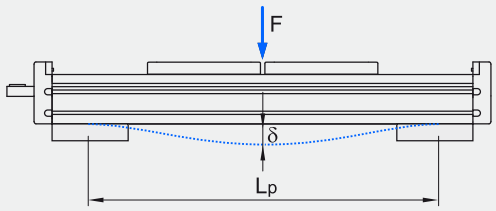
MTV 65



TECHNICAL DATA

Deflection of the 2LR version

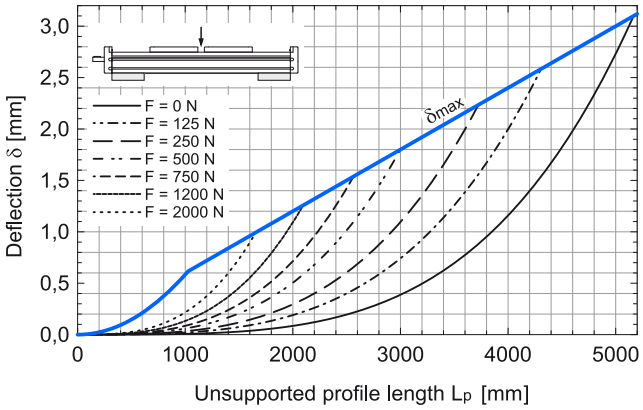
Fixed - fixed mounting



δ Maximum deflection of the linear unit [mm]
δmax Maximum permissible deflection of the linear unit [mm]
F Applied force [N]
Lp Unsupported profile length [mm]

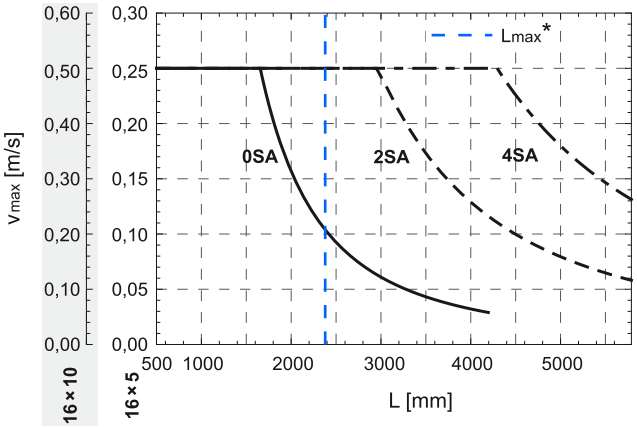
The maximum permissible deflection δmax must not be exceeded. In the case that maximum deflection δ exceeds the maximum permissible deflection δmax additional profile supports are needed.

MTV 65 2LR



Maximum travel speed as a function of the profile length (Vmax - L curves)

MTV 65 2LR

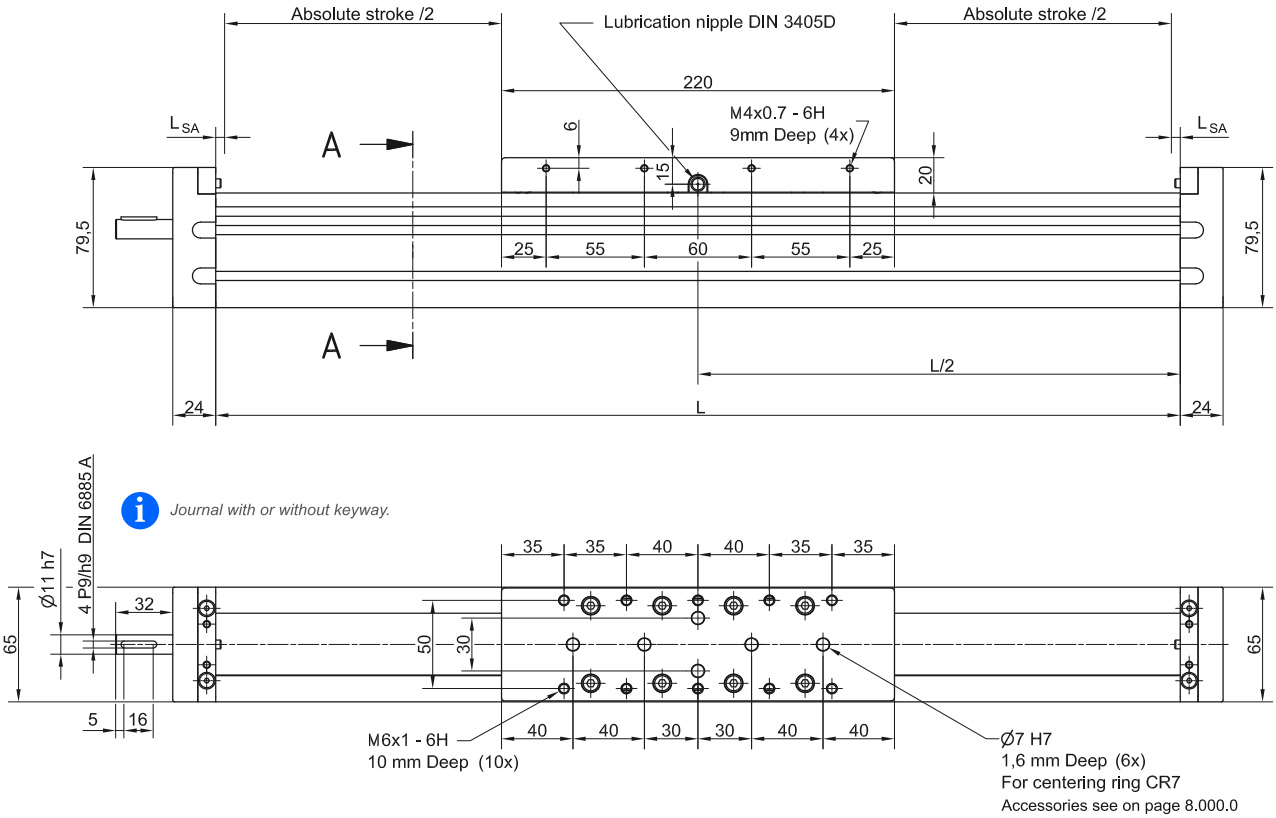


* Max. length Lmax of MTV 65 2LR linear unit with 16x10 ball screw.

In order to improve the products in this catalogue the specifications are subject to change without notice.

DIMENSIONS

Linear Unit doesn't include any safety
Absolute stroke = Effective stroke + 2 x Safety stroke stroke.

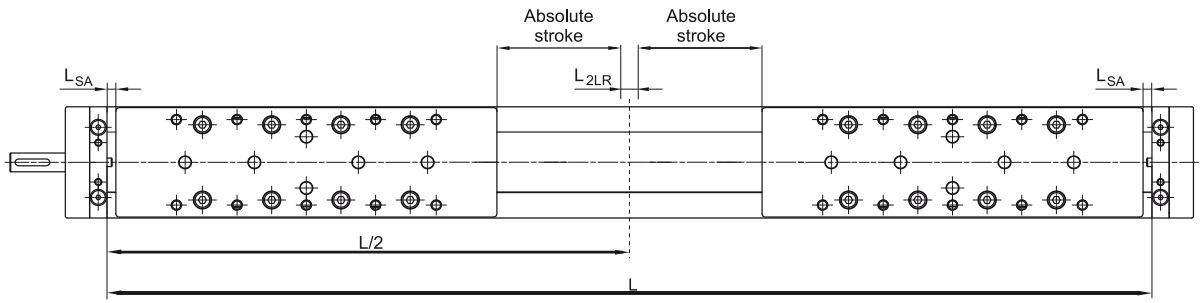


n	L_{SA}
0	5,0
2SA	31,0
4SA	62,0

L_{SA} Additional length [mm]

All dimensions in mm;
Drawings scales are not equal.

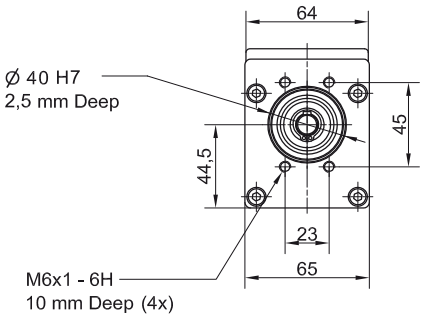
2LR version

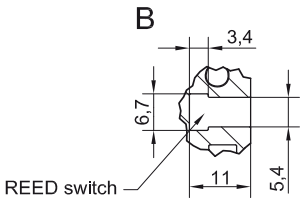


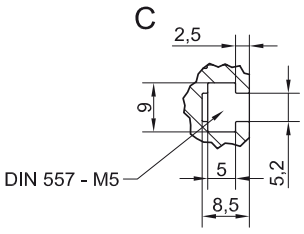
n	L_{SA}	L_{2LR}
0	5,0	5,0
2SA	31,0	67,0
4SA	62,0	129,0

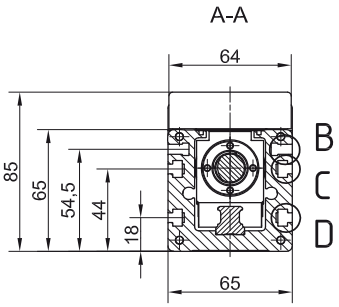
L_{SA} Additional length [mm]
L_{2LR} Min. distance between carriages [mm]

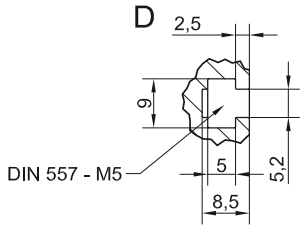
DIMENSIONS





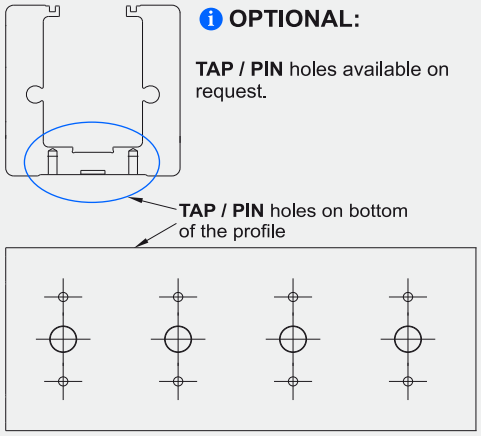






OPTIONAL:

TAP / PIN holes available on request.



Drawing only for presentational use

All dimensions in mm.
Drawings scales are not equal.

Mounting the drive

- by the **MOTOR SIDE DRIVE - MSD** *(Page 7.095.0)*
- by the **MOTOR ADAPTER WITH COUPLING** *(Page 8.020.0)*

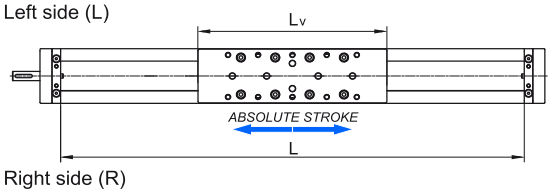
Available on request.

Defining of the linear unit length

Standard version

L = Effective stroke + 2 × Safety stroke + Lv + 2 × L_{SA} + A × (n_c - 1)

Ltotal = L + 48 mm, Lv = 220 mm



Multiple carriages

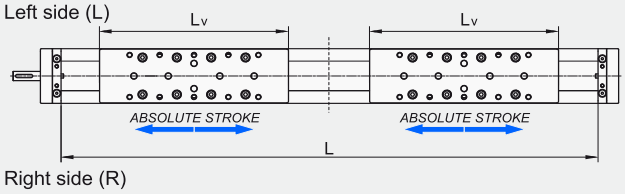
A ≥ Lv *Connection between the carriages must be provided by the customer*

n_c - Number of carriages

Version 2LR

L = 2 × (Effective stroke + 2 × Safety stroke) + 2 × Lv + 2 × L_{SA} + L_{2LR} + A × (n_c - 1)

Ltotal = L + 48 mm, Lv = 220 mm



Multiple carriages

A ≥ Lv *Connection between the carriages must be provided by the customer*

n_c - Number of carriages

In order to improve the products in this catalogue the specifications are subject to change without notice.

TECHNICAL DATA

General technical data

Linear Unit	Carriage length	Dynamic Load capacity	Dynamic moment			Max. permissible loads					* Max. length	* Max. stroke
						Forces		Moments				
	Lv [mm]	C [N]	Mx [Nm]	My [Nm]	Mz [Nm]	Fpy [N]	Fpz [N]	Mpx [Nm]	Mpy [Nm]	Mpz [Nm]	Lmax [mm]	[mm]
MTV 80	290	34200	370	1470	1470	8930	15070	150	500	384	5480	5163
MTV 80 2LR	290	34200	370	1470	1470	8930	15070	150	500	384	11055	5224

*For lengths / stroke over the stated value in the table above please contact us.
Values for max. stroke are not valid for multiple carriages and screw support SA
(equation of defining the linear unit length for particular size of the linear unit needs to be used).

Operating conditions	
Operating temp.	0°C ~ +60°C
Duty cycle	100%

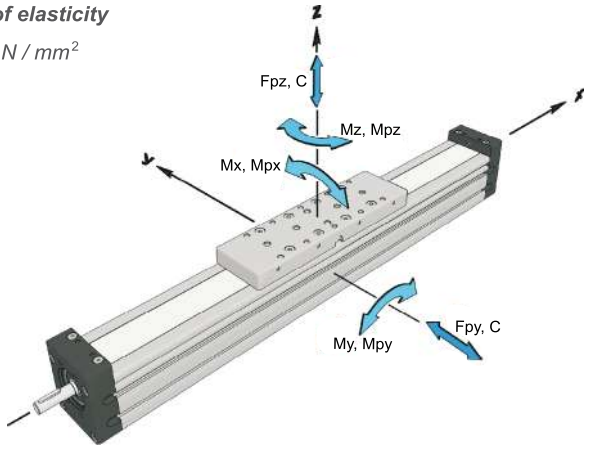
For operating temperature out of the presented range, please contact us.

Recommended values of loads:

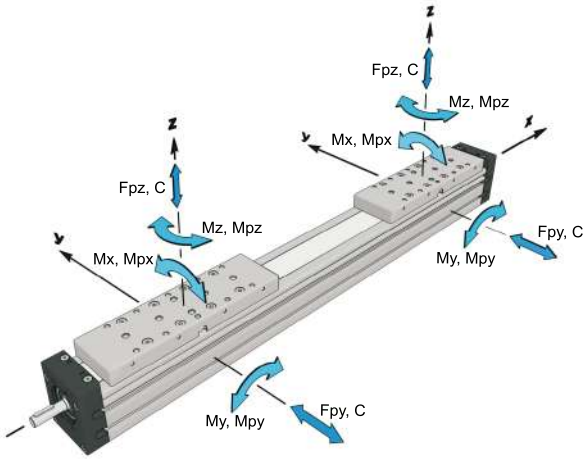
All the data of dynamic moments and load capacities stated in the upper table are theoretical without considering any safety factor. The safety factor depends on the application and its requested safety. We recommend a minimum safety factor (fs =5.0)

Modulus of elasticity

$E = 70000\ N / mm^2$



Standard version



2LR version

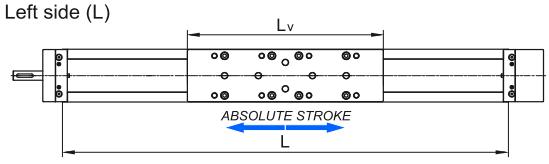
Defining of the linear unit length

Standard version

L = Effective stroke + 2 × Safety stroke + Lv + 2 × LSA + A × (nc - 1) + 15 mm

Ltotal = L + 81 mm, Lv = 290 mm



Multiple carriages

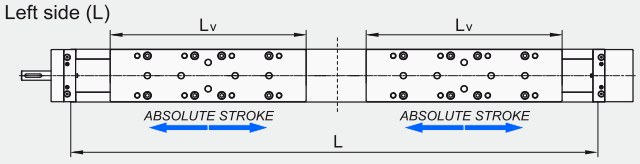
A ≥ Lv *Connection between the carriages must be provided by the customer*

nc - Number of carriages

2LR version

L = 2 × (Effective stroke + 2 × Safety stroke) + 2 × Lv + 2 × LSA + L2LR + A × (nc - 1) + 15 mm

Ltotal = L + 81 mm, Lv = 290 mm



Multiple carriages

A ≥ Lv *Connection between the carriages must be provided by the customer*

nc - Number of carriages

In order to improve the products in this catalogue the specifications are subject to change without notice.

TECHNICAL DATA

General technical data

Linear Unit	Carriage length	Dynamic Load capacity	Dynamic moment			Max. permissible loads					* Max. length	* Max. stroke
						Forces		Moments				
	Lv [mm]	C [N]	Mx [Nm]	My [Nm]	Mz [Nm]	Fpy [N]	Fpz [N]	Mpx [Nm]	Mpy [Nm]	Mpz [Nm]	Lmax [mm]	[mm]
MTV 110	330	49600	630	2650	2650	10000	20260	295	670	535	5850	5456

*For lengths / stroke over the stated value in the table above please contact us.
Values for max. stroke are not valid for multiple carriages and screw support SA
(equation of defining the linear unit length for particular size of the linear unit needs to be used).

Operating conditions	
Operating temp.	0°C ~ +60°C
Duty cycle	100%

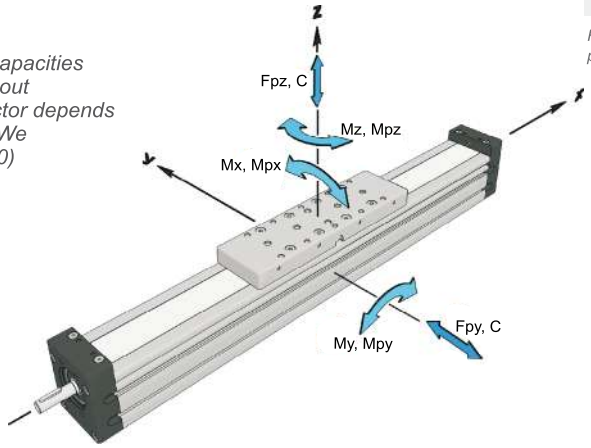
For operating temperature out of the presented range, please contact us.

Recommended values of loads:

All the data of dynamic moments and load capacities stated in the upper table are theoretical without considering any safety factor. The safety factor depends on the application and its requested safety. We recommend a minimum safety factor (fs =5.0)

Modulus of elasticity

$E = 70000\ N / mm^2$



General technical data for double carriage

MTJ ECO

CHARACTERISTICS

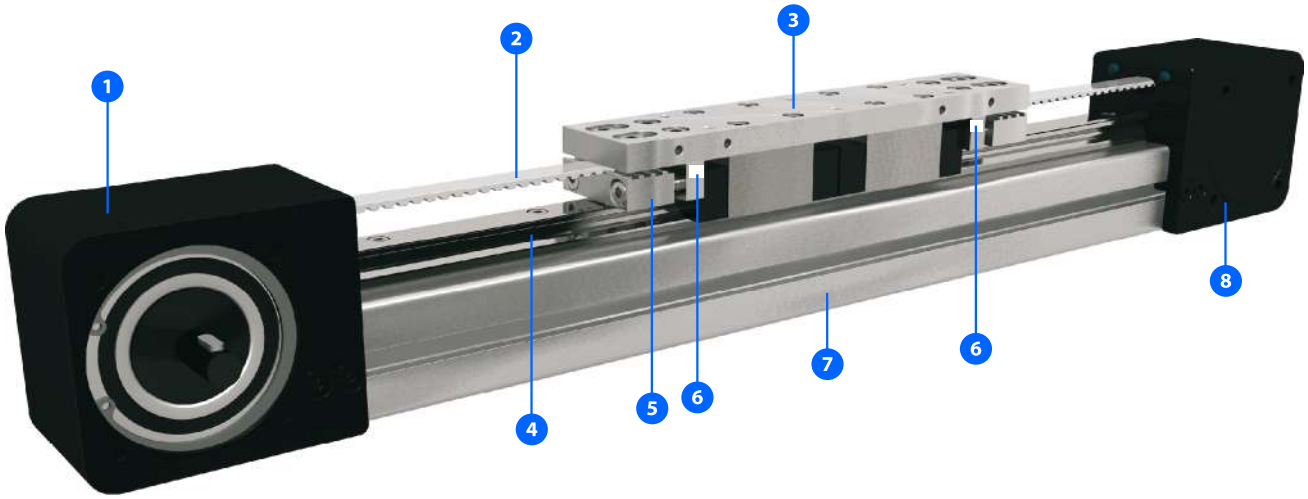
The **MTJ ECO** series Linear Unit is a powerful and cost-effective Linear Unit with toothed belt drive and a Zero-backlash Ball rail guide system for easy and accurate linear movements.
It can easily be combined to multi-axis systems.
Excellent price-/performance ratio and quick delivery time are ensured.
An extruded aluminum Profile from 6063 AL with on it mounted Zero-backlash Ball rail guide system, allows high load capacities and optimal cycles for the movement of larger masses at high speed.
The linear unit MTJ ECO uses a pre-tensioned steel reinforced AT polyurethane timing toothed belt. In conjunction with a Zero-backlash drive pulley high moments with alternating loads with good positioning accuracy, low wear and low noise can be realized.
The aluminum Profile includes T-slots for fixing the Linear Unit and for attaching sensors and switches .
Different carriage lengths of the Linear Unit allow the possibility to attach additional accessories on the side.
Lubrication holes on the carriage allow easy re-lubrication of the Ball rail guide .
For the linear unit MTJ ECO various adaptation options, for attaching (or redirecting), for Motors or Gearboxes are available.

The aluminium profiles are manufactured according to the medium EN 12020-2 standard

Straightness = 0,35 mm/m; Max. torsion = 0,35 mm/m; Angular torsion = 0,2 mm/40 mm; Parallelism = 0,2 mm

In order to improve the products in this catalogue the specifications are subject to change without notice.

STRUCTURAL DESIGN



1 - Drive block with pulley
2 - AT polyurethane toothed belt with steel tension cords
3 - Carriage
4 - Linear Ball Guideway
5 - Belt Tensioning system
6 - Lubrication port
7 - Aluminium profile-Hard anodized
8 - End block

HOW TO ORDER

Series :

MTJ

Size :

40

Type :

ECO

Absolute stroke [mm] :
(Absolute stroke = Effective stroke + 2 x Safety stroke)

Carriage Version :

S : Short

L : Long

Number of carriages :

The stated number specifies the number of carriages on one Linear unit (up to 5 carriages avaliable)

Leave blank : For the case of one carriage

Distance between two carriages [mm] :

Leave blank : For the case of one carriage

Type of drive pulley :

0 : Pulley with through hole

1 : Pulley with journal

10 : Pulley with journal (without Keyway)

2 : Pulley with journal on both sides

20 : Pulley with journal on both sides (without Keyway)

3 : Without drive unit

Drive journal position :

L : Journal on left side

R : Journal on right side

Leave blank : For type of drive pulley 0, 2, 20 and 3

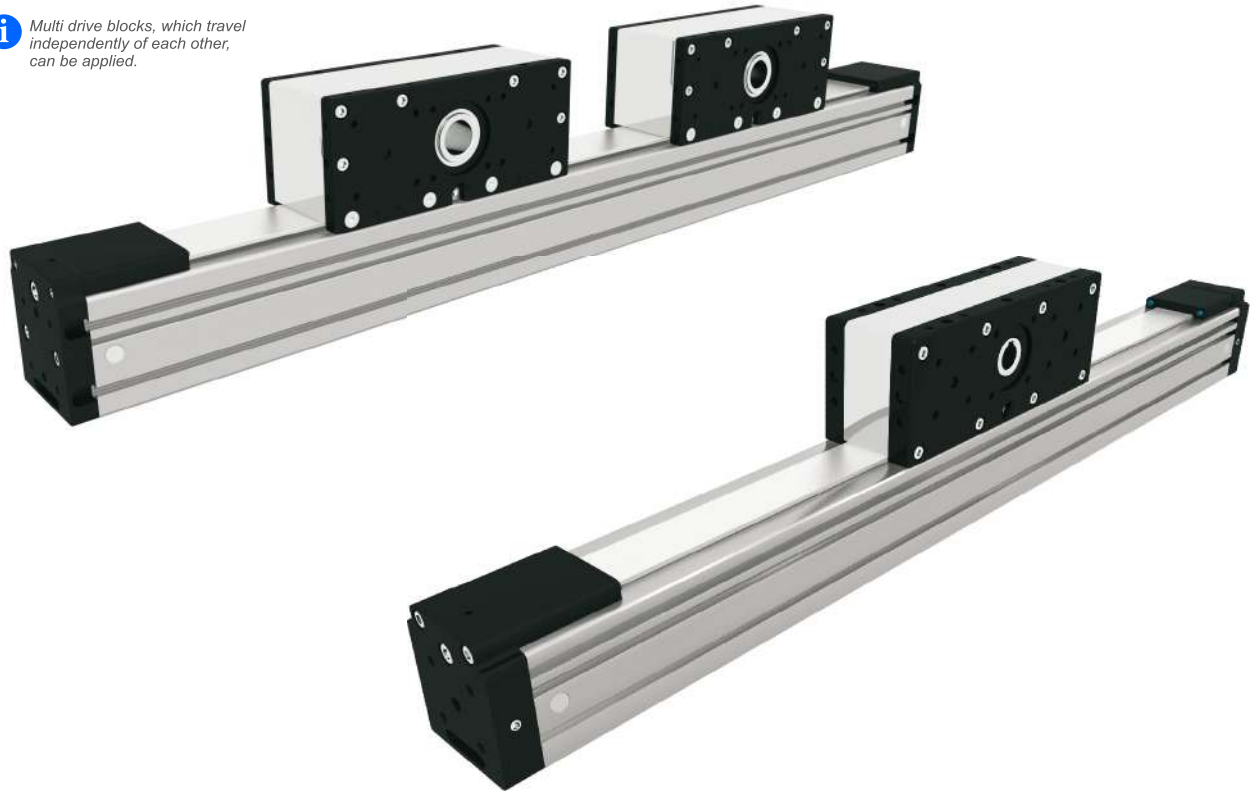
MTJZ

CHARACTERISTICS

The **MTJZ** series contains Z-axis Linear Units with toothed belt drive, integrated Ball rail system and compact dimensions. This Linear Units provide high performance features such as, high speed, good accuracy and repeatability by vertical applications.
They can easily be combined to multi-axis systems.
Excellent price-/performance ratio and quick delivery time are ensured.
The compact, precision-extruded aluminum Profile from 6063 AL with integrated Zero-backlash Ball rail guide system, allows high load capacities and optimal cycles for the movement of larger masses at high speed.
In the linear units MTJZ is used a pre-tensioned steel reinforced AT polyurethane timing toothed belt. In conjunction with a Zero-backlash drive pulley high moments with alternating loads with good positioning accuracy, low wear and low noise can be realized.
The in the Profile slot driving Polyurethane timing belt protects all the parts in the Profile from dust and other contaminations
The aluminum Profile includes T-slots for attaching sensors and switches. Also, a Reed switch can be used here.
The drive block provides the possibility to attach a Motor or Gearbox housing and additional accessories on it.
Central lubrication port on the drive block allows easy re-lubrication of the Ball rail guide.
For the linear units MTJZ various adaptation options, for attaching (or redirecting), for Motors or Gearboxes are available.

Multi drive blocks, which travel independently of each other, can be applied.

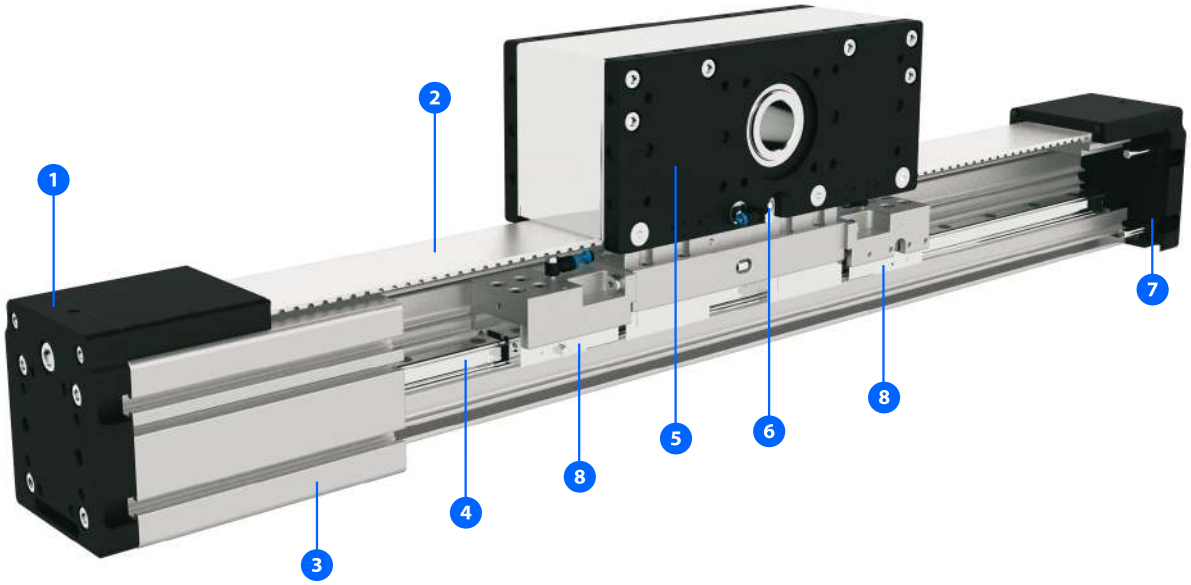


The aluminium profiles are manufactured according to the medium EN 12020-2 standard

Straightness = 0,35 mm/m; Max. torsion = 0,35 mm/m; Angular torsion = 0,2 mm/40 mm; Parallelism = 0,2 mm

In order to improve the products in this catalogue the specifications are subject to change without notice.

STRUCTURAL DESIGN



1 - Tension End with integrated belt tensioning system
2 - AT polyurethane toothed belt with steel tension cords
3 - Aluminium profile-Hard anodized
4 - Linear Ball Guideway
5 - Drive block with pulley, Motor flange; with built in Magnets
6 - Central lubrication port; both sides
7 - Tension End with integrated belt tensioning system
8 - Clamping and braking element for linear guideway

DIMENSIONS

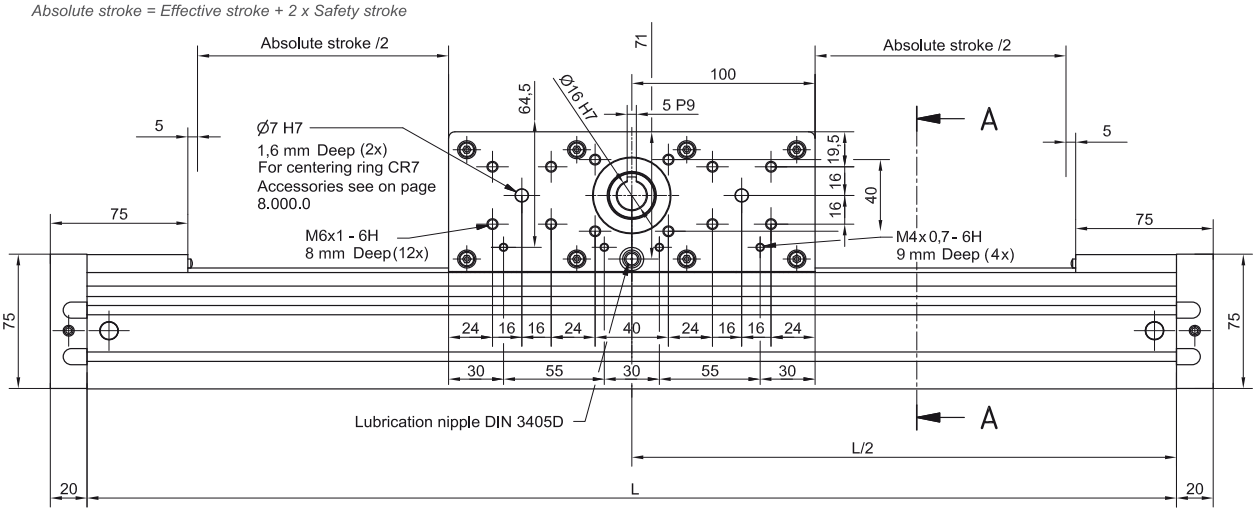
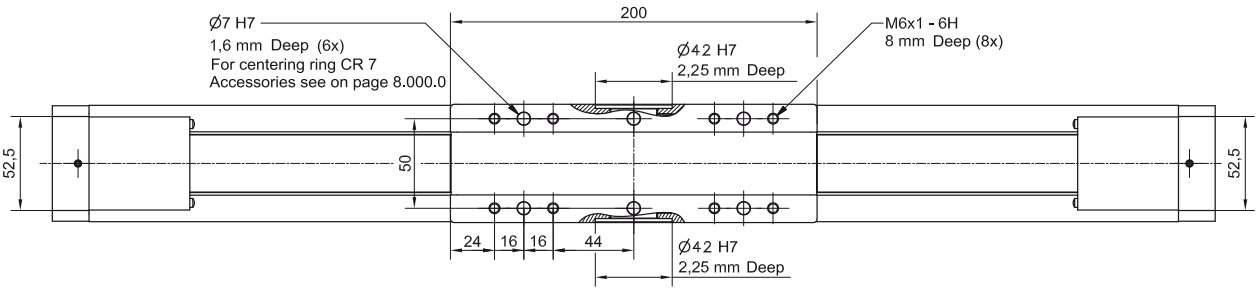
Linear Unit doesn't include any safety stroke.

Absolute stroke = Effective stroke + 2 x Safety stroke





All dimensions in mm; Drawings scales are not equal.

TYPE 0

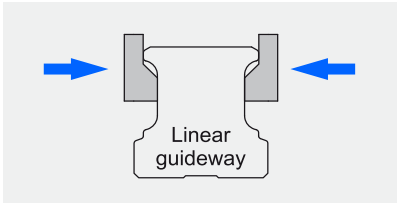
Drive block with clamping element

Clamping by spring-loaded energy

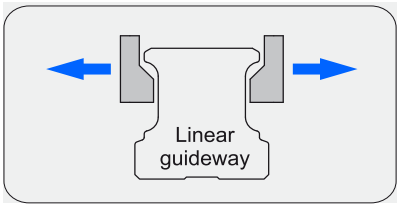


Air pressure = 0 bar

Holding force = 1400 N

Holding force is tested on clamping element using a slightly lubricated rail (ISO VG 68).

Opened by air pressure



Opening air pressure = 5,5 - 8 bar

The air pressure opens clamping pistons. Free movement is allowed.

Purified and oiled air shall be used (according to ISO 8573-1 Class 4). Recommended filter size is 25 µm.

Linear Unit	Mass of drive block [kg]	* Mass of linear unit [kg]
MTJZ 110	12,9	23,3 + 0,0147 × (Abs. stroke + (nb - 1) × A) + 12,9 × (nb - 1)

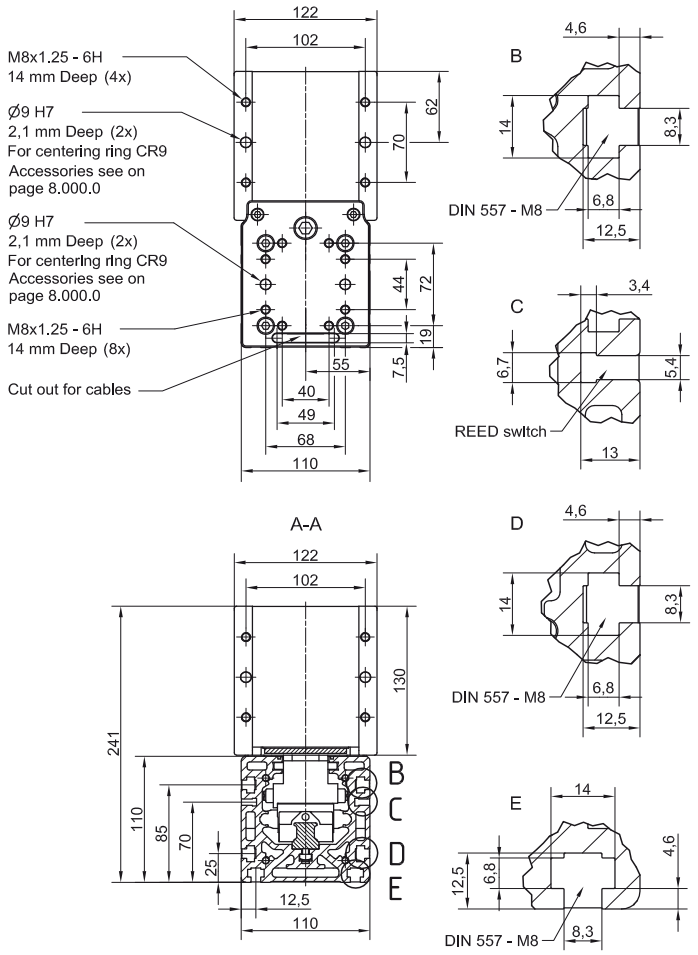
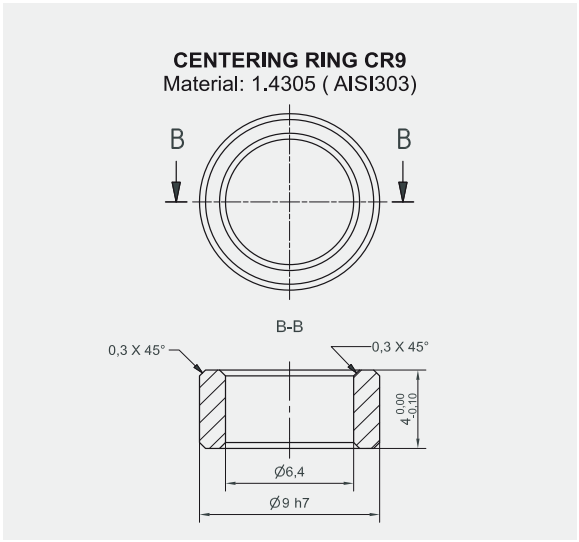
DIMENSIONS



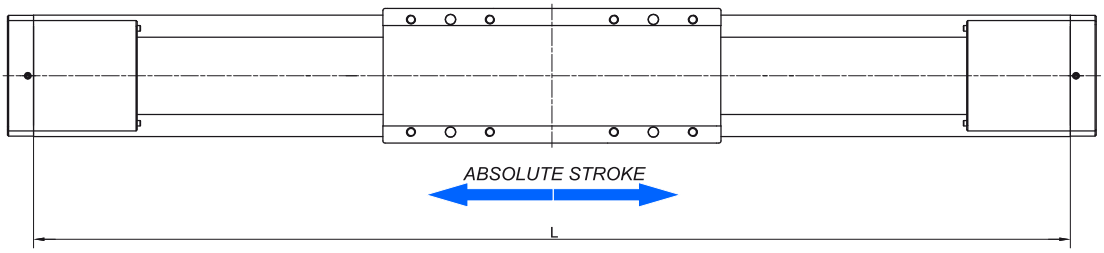


All dimensions in mm; Drawings scales are not equal.

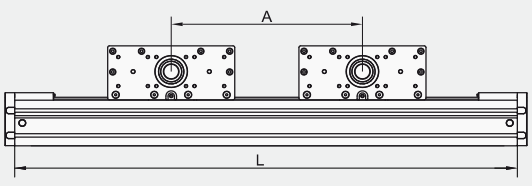
Defining of the linear unit length

L = Effective stroke + 2 × Safety stroke + 496 mm

Ltotal = L + 46 mm



Multiple drive blocks



L = Effective stroke + 2 × Safety stroke + A × (n_B - 1) + 496 mm

Ltotal = L + 46 mm

A ≥ 300 mm

***A** ≥ 410 mm

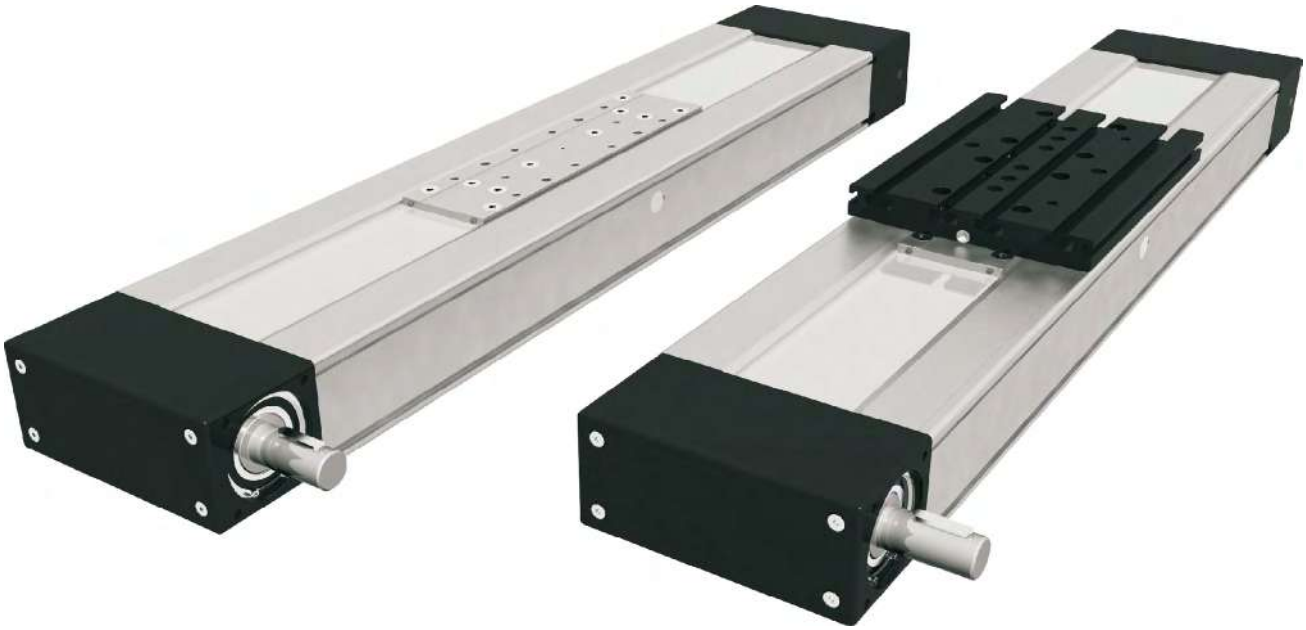
** In case of using the drive blocks with clamping element*

In order to improve the products in this catalogue the specifications are subject to change without notice.

CTJ

CHARACTERISTICS

The **CTJ** series includes Linear Units with a toothed belt drive and two parallel, integrated, Zero-backlash rail guides. Compact dimensions allow high performance features such as, high speed and repeatability. They can easily be combined to multi-axis systems.
Excellent price-/performance ratio and quick delivery time are ensured.
A compact , precision-extruded aluminum Profile from AL 6063, with two parallel, integrated Zero-backlash rail guide systems, allows high load capacities and an optimal sequence for the movement of larger masses at high speed.
In the linear units CTJ is used a pre-tensioned steel reinforced AT polyurethane timing toothed belt. In conjunction with a Zero-backlash drive pulley high moments with alternating loads with good positioning accuracy, low wear and low noise can be realized.
The in the Profile slot driving Polyurethane timing belt, protects all the parts in the Profile from dust and other contaminations.
Different carriage lengths with lubrication port allows for easy re-lubrication of the Ball rail guide system and allows the possibility to attach additional accessories. The re-lubrication can also be done through maintenance holes on the side of the Profile.
The aluminum profile includes T-slots for fixing the Linear Unit and for attaching sensors and switches. Also, a Reed switch can be used here.
For the linear units CTJ various adaptation options, for attaching (or redirecting), for Motors or Gearboxes are available.

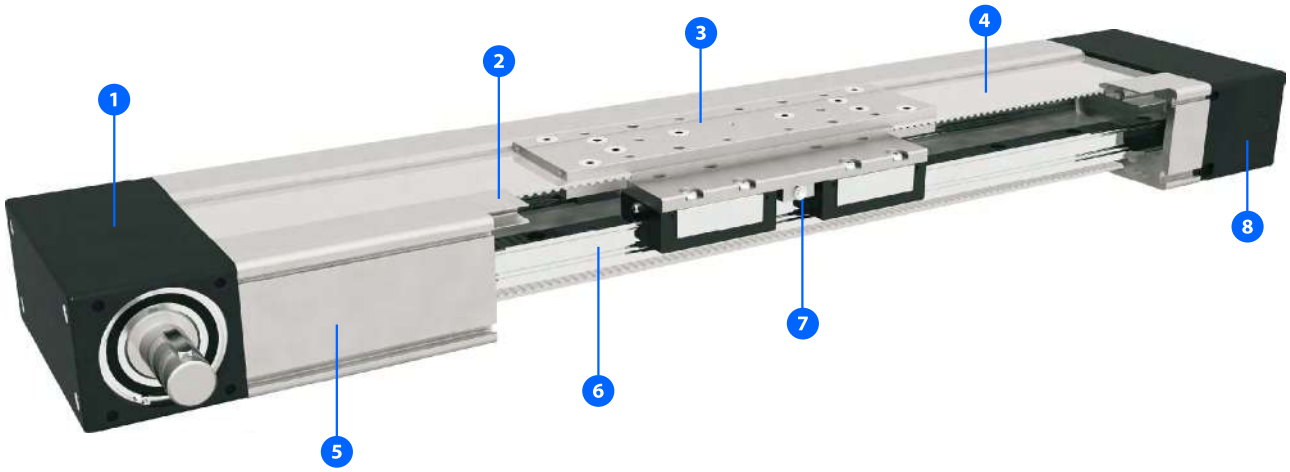


The aluminium profiles are manufactured according to the medium EN 12020-2 standard

Straightness = 0,35 mm/m; Max. torsion = 0,35 mm/m; Angular torsion = 0,2 mm/40 mm; Parallelism = 0,2 mm

In order to improve the products in this catalogue the specifications are subject to change without notice.

STRUCTURAL DESIGN



1 - Drive block with pulley
2 - Aluminum cover
3 - Carriage; with built in Magnets
4 - AT polyurethane toothed belt with steel tension cords
5 - Aluminium profile-Hard anodized
6 - Two integrated Linear Ball Guideways
7 - Central lubrication port; both sides
8 - Tension End with integrated belt tensioning system

HOW TO ORDER

Series :
CTJ

Size :
90
110
145
200

Absolute stroke [mm] :
(Absolute stroke = Effective stroke + 2 x Safety stroke)

Carriage Version :
S : Short
L : Long

Number of carriages :
The stated number specifies the number of carriages on one Linear unit
(up to 5 carriages avaliable)
Leave blank : For the case of one carriage

Distance between two carriages [mm] :
Leave blank : For the case of one carriage

Type of drive pulley :
1 : Pulley with journal
10 : Pulley with journal (without Keyway)
2 : Pulley with journal on both sides
20 : Pulley with journal on both sides (without Keyway)
3 : Without drive unit

Drive journal position :
L : Journal on left side
R : Journal on right side
Leave blank : For type of drive pulley 2, 20 and 3

*By CTJ 200 with drive pulley 2 or 20, the drive journal position left - **L** or right - **R** side must be also specified - motor/gearbox attachment side.*

Connection plate :
0: Without
1: With

In order to improve the products in this catalogue the specifications are subject to change without notice.

CTJ 90 L			0,42 × nc							

*The stated values are for strokes (and distances between the carriages A) up to 500mm. No Load Torque value increases with stroke (and with A) elongation.
n_C - Number of carriages

**For travel speed and acceleration over the stated value in the table above please contact us.

TECHNICAL DATA

Mass and mass moment of inertia

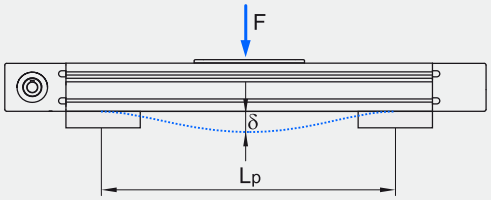
Linear Unit	Mass of linear unit [kg]	Mass moment of inertia [10^{-5} kg m^2]	Planar moment of inertia	
			Iy [cm^4]	Iz [cm^4]
CTJ 90 S	1,7 + 0,0048 × (Abs. stroke + (nc - 1) × A) + 0,20 × (nc - 1)	7 + 0,0031 × (Abs. stroke + (nc - 1) × A) + 4,1 × (nc - 1)	13,4	107,0
CTJ 90 L	2,1 + 0,0048 × (Abs. stroke + (nc - 1) × A) + 0,35 × (nc - 1)	11 + 0,0031 × (Abs. stroke + (nc - 1) × A) + 7,2 × (nc - 1)		

*Absolute stroke [mm]
A - Distance between carriages [mm]. More info on following pages.
nc - Number of carriages

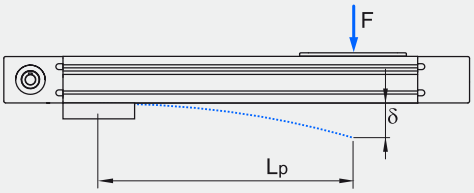
Mass calculation doesn´t include mass of motor, reduction gear, switches and clamps.

Deflection of the linear unit

Fixed - fixed mounting



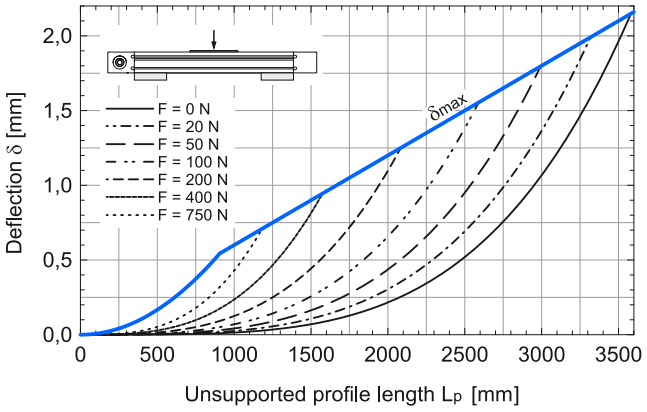
Fixed - free mounting

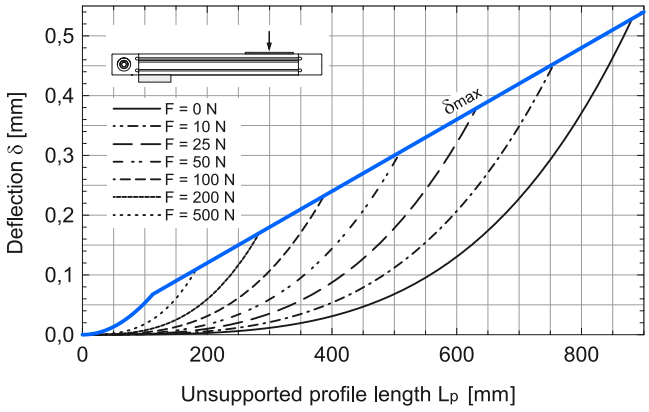


δ Maximum deflection of the linear unit [mm]
δmax Maximum permissible deflection of the linear unit [mm]
F Applied force [N]
Lp Unsupported profile length [mm]

The maximum permissible deflection δmax must not be exceeded. In the case that maximum deflection δ exceeds the maximum permissible deflection δmax additional profile supports are needed.

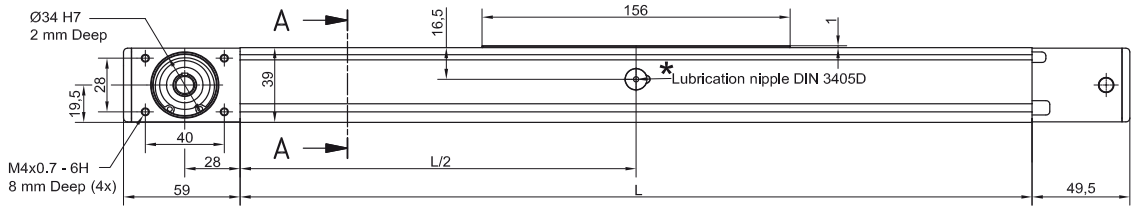
CTJ 90





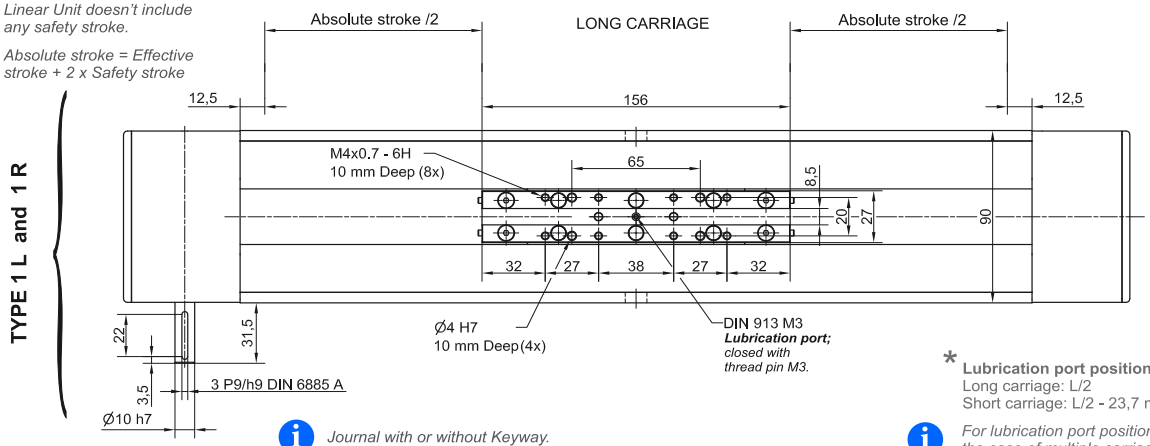
In order to improve the products in this catalogue the specifications are subject to change without notice.

DIMENSIONS



Linear Unit doesn't include any safety stroke.

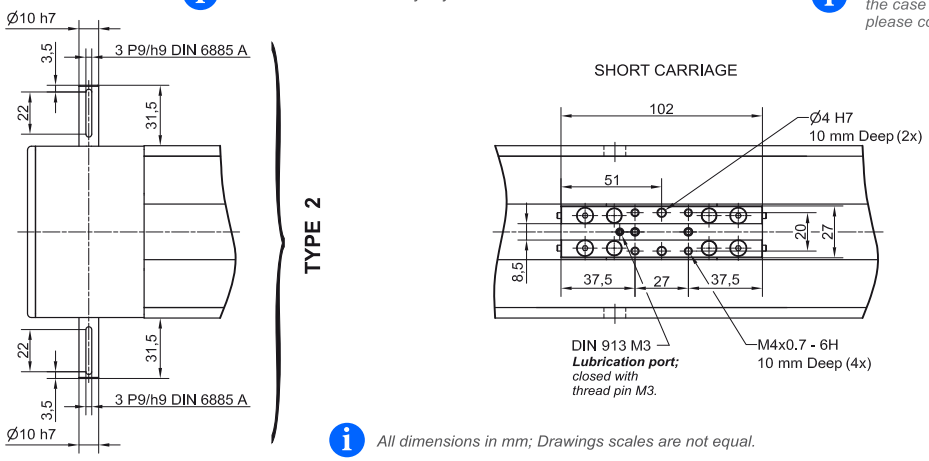
Absolute stroke = Effective stroke + 2 x Safety stroke



* **Lubrication port position**:
Long carriage: L/2
Short carriage: L/2 - 23,7 mm

For lubrication port positions in the case of multiple carriages please contact us.

Journal with or without Keyway.



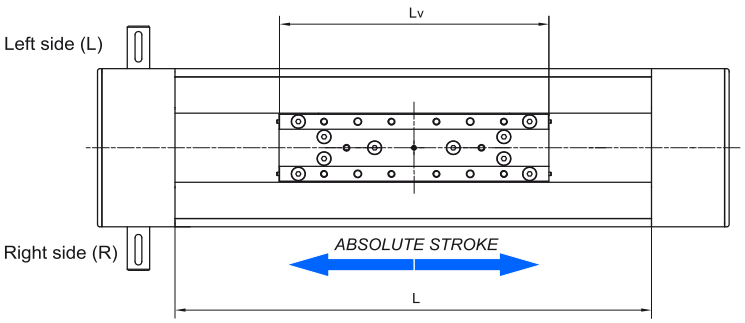
All dimensions in mm; Drawings scales are not equal.

Defining of the linear unit length

L = Effective stroke + 2 × Safety stroke + Lv + A × (nc - 1) + 25 mm

Ltotal= L + 108,5 mm

nc - Number of carriages

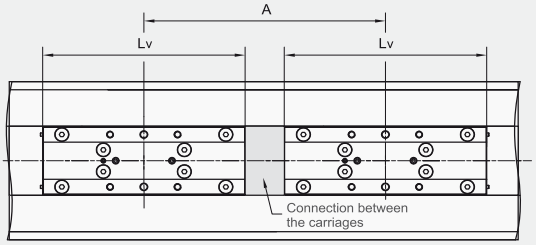


Lv - Long carriage = 156 mm
Lv - Short carriage = 102 mm

Multiple carriages

A ≥ Lv

Carriages are connected inside the profile with an aluminium plate (or a toothed belt for the case of longer distances A)



For the case of A [mm] > Alim :

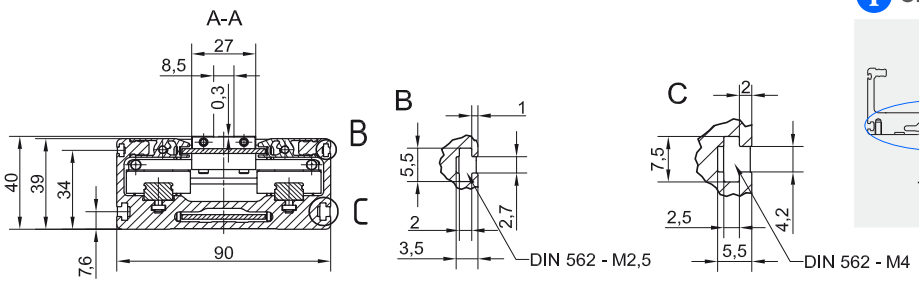
- a toothed belt for the connection of the carriages will be used,
- the following condition must be met:

A [mm] = Alim + 3 × i,

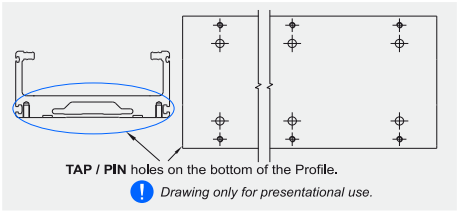
where i ∈ {1,2,3,...}.

	CTJ 90 S	CTJ 90 L
Alim [mm]	401,5	455,5

DIMENSIONS



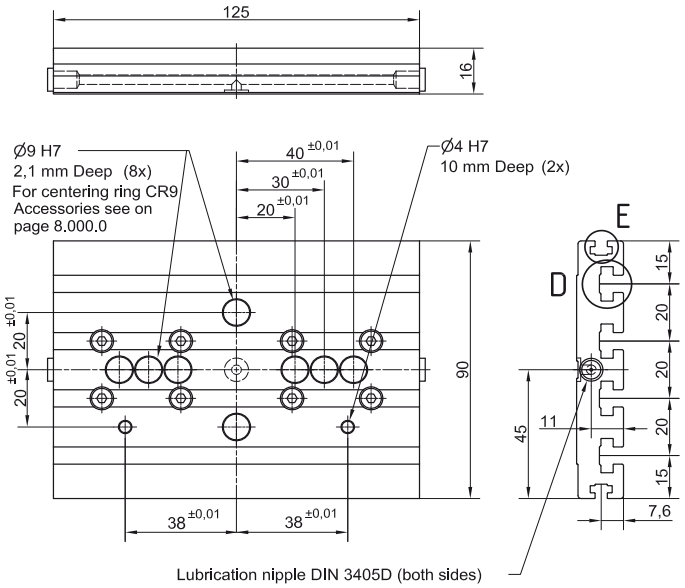
OPTIONAL: TAP / PIN holes available on request.



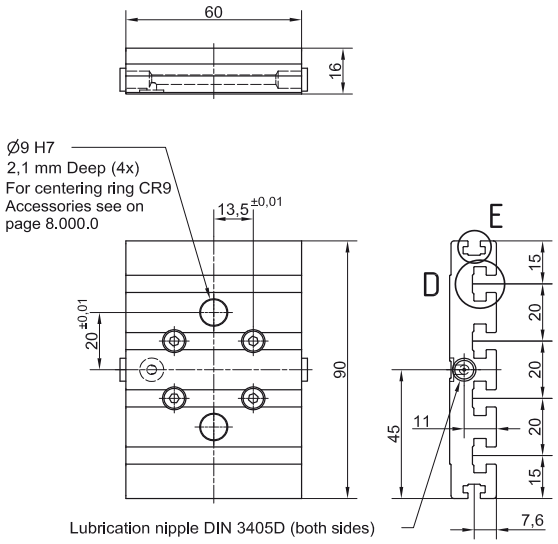
All dimensions in mm; Drawings scales are not equal.

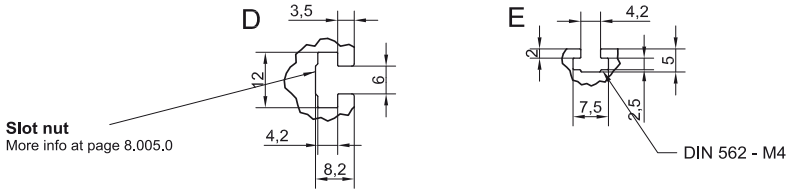
CONNECTION PLATE

CTJ 90 L



CTJ 90 S





Linear Unit	Plate length [mm]	Weight [kg]	Code
CTJ 90 S	60	0,2	103661
CTJ 90 L	125	0,4	103660

Mounting elements for mounting the connection plate on the Linear unit are inlcuded.

Mounting the drive

- by the **MOTOR ADAPTER WITH COUPLING** *(Page 8.020.0)*

Available on request.

In order to improve the products in this catalogue the specifications are subject to change without notice.

CTJ 110 L			1,00 × nc							

*The stated values are for strokes (and distances between the carriages A) up to 500mm. No Load Torque value increases with stroke (and with A) elongation.
nc - Number of carriages

**For travel speed and acceleration over the stated value in the table above please contact us.

TECHNICAL DATA

Mass and mass moment of inertia

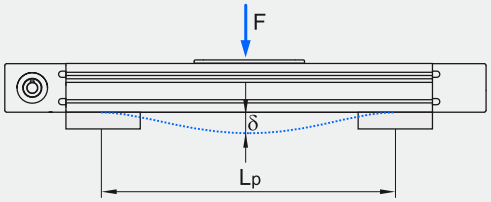
Linear Unit	Mass of linear unit [kg]	Mass moment of inertia [10^{-5} kg m^2]	Planar moment of inertia	
			Iy [cm^4]	Iz [cm^4]
CTJ 110 S	3,6 + 0,0072 × (Abs. stroke + (nc - 1) × A) + 0,64 × (nc - 1)	36 + 0,0125 × (Abs. stroke + (nc - 1) × A) + 23,3 × (nc - 1)	31,1	217,2
CTJ 110 L	4,2 + 0,0072 × (Abs. stroke + (nc - 1) × A) + 0,98 × (nc - 1)	49 + 0,0125 × (Abs. stroke + (nc - 1) × A) + 35,8 × (nc - 1)		

*Absolute stroke [mm]
A - Distance between carriages [mm]. More info on following pages.
nc - Number of carriages

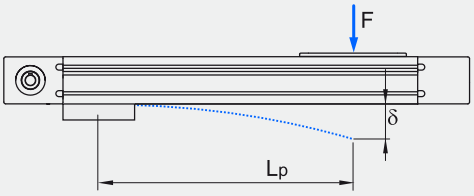
Mass calculation doesn´t include mass of motor, reduction gear, switches and clamps.

Deflection of the linear unit

Fixed - fixed mounting



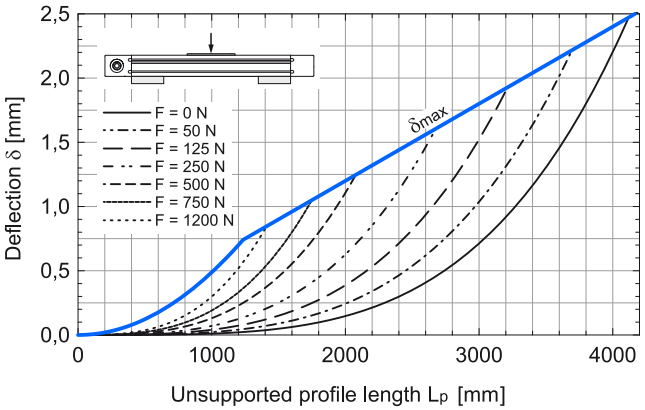
Fixed - free mounting

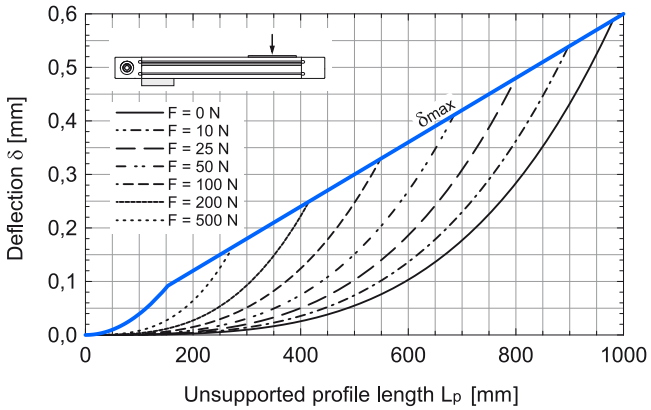


δ Maximum deflection of the linear unit [mm]
δmax Maximum permissible deflection of the linear unit [mm]
F Applied force [N]
Lp Unsupported profile length [mm]

The maximum permissible deflection δmax must not be exceeded. In the case that maximum deflection δ exceeds the maximum permissible deflection δmax additional profile supports are needed.

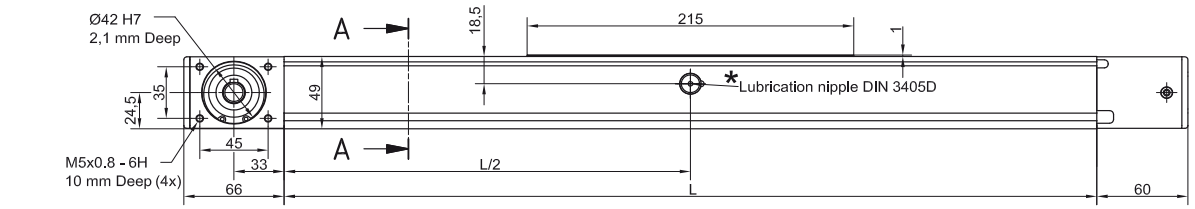
CTJ 110





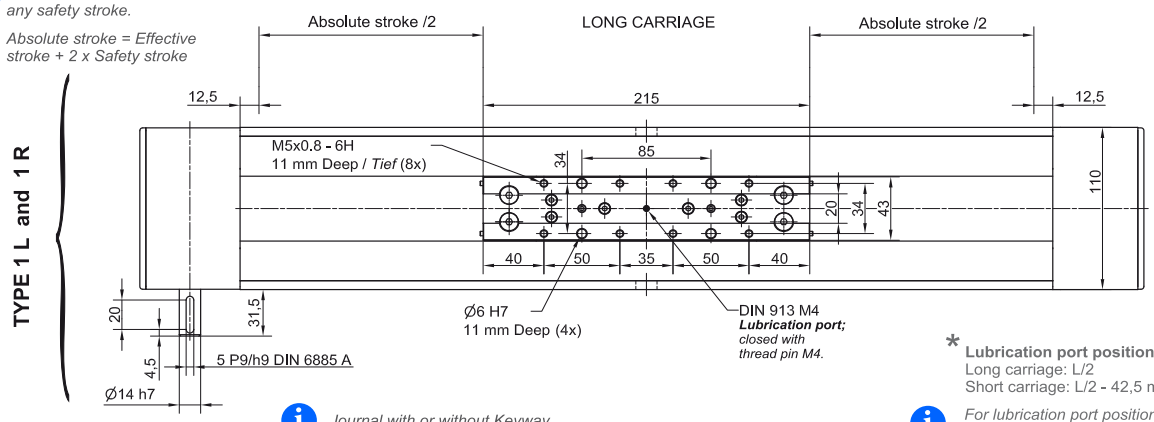
In order to improve the products in this catalogue the specifications are subject to change without notice.

DIMENSIONS



Linear Unit doesn't include any safety stroke.

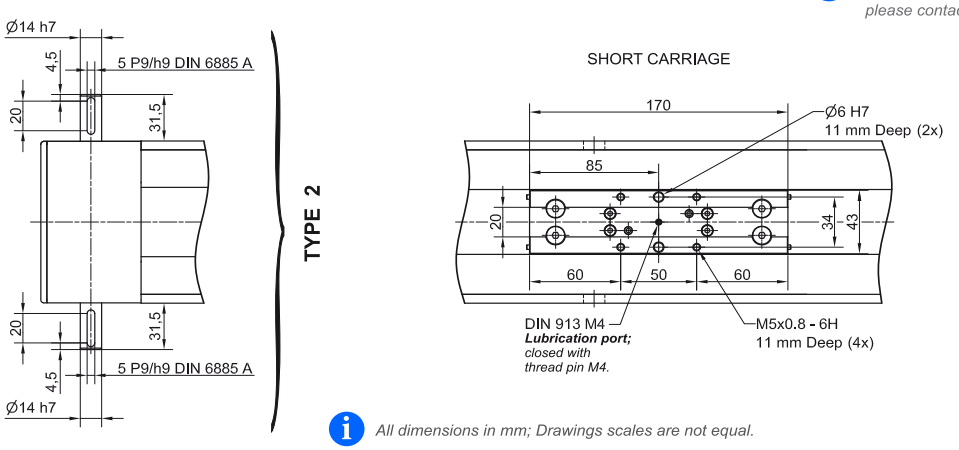
Absolute stroke = Effective stroke + 2 x Safety stroke



Journal with or without Keyway.

*** Lubrication port position**:
Long carriage: L/2
Short carriage: L/2 - 42,5 mm

For lubrication port positions in the case of multiple carriages please contact us.



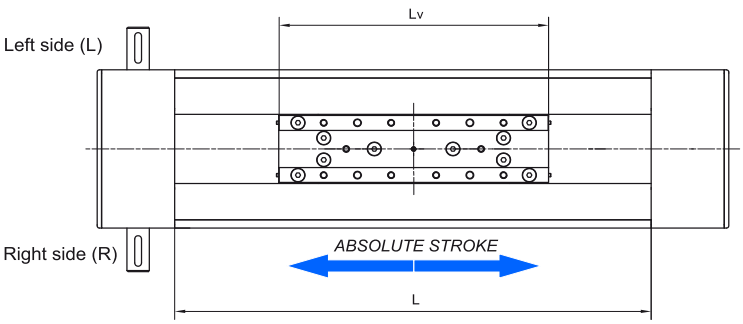
All dimensions in mm; Drawings scales are not equal.

Defining of the linear unit length

L = Effective stroke + 2 × Safety stroke + Lv + A × (nc - 1) + 25 mm

Ltotal = L + 126 mm

nc - Number of carriages

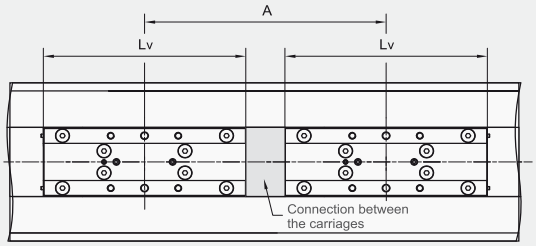


Lv - Long carriage = 215 mm
Lv - Short carriage = 170 mm

Multiple carriages

A ≥ Lv

Carriages are connected inside the profile with an aluminium plate (or a toothed belt for the case of longer distances A)



For the case of A [mm] > Alim :

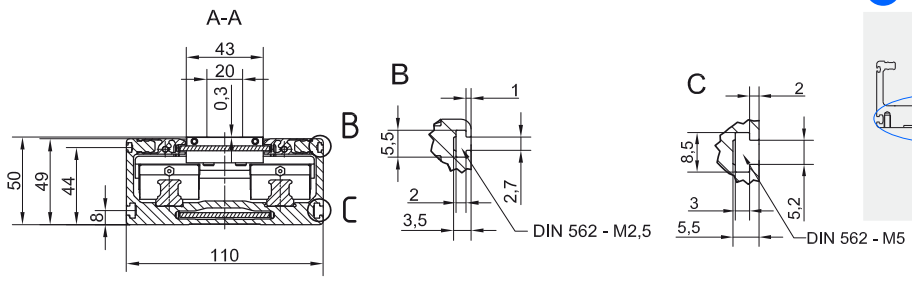
- a toothed belt for the connection of the carriages will be used,
- the following condition must be met:

A [mm] = Alim + 5 × i,

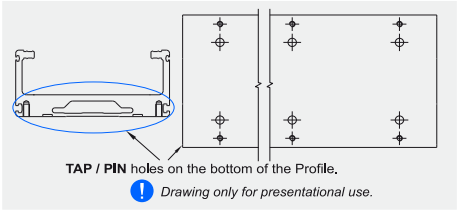
where i ∈ {1,2,3,...}.

	CTJ 110 S	CTJ 110 L
Alim [mm]	**601**	**646**

DIMENSIONS



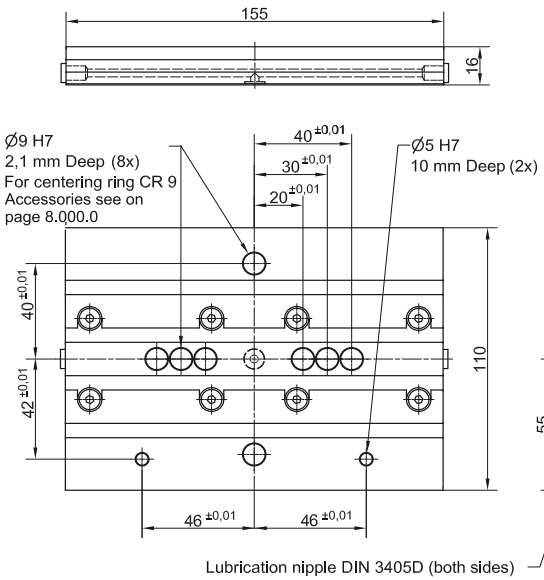
OPTIONAL: TAP / PIN holes available on request.



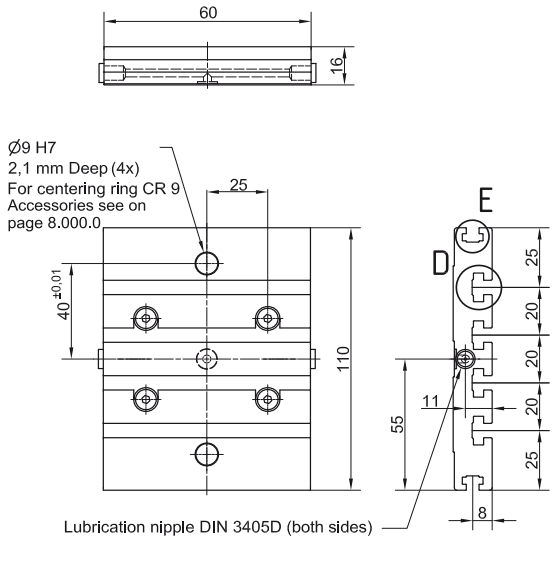
All dimensions in mm; Drawings scales are not equal.

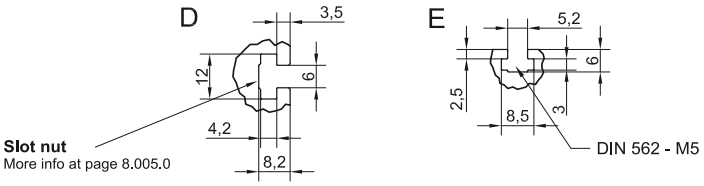
CONNECTION PLATE

CTJ 110 L



CTJ 110 S





Linear Unit	Plate length [mm]	Weight [kg]	Code
CTJ 110 S	60	0,35	103663
CTJ 110 L	155	0,60	103662

Mounting elements for mounting the connection plate on the Linear unit are inlcuded.

Mounting the drive

- by the **MOTOR ADAPTER WITH COUPLING** *(Page 8.020.0)*

Available on request.

In order to improve the products in this catalogue the specifications are subject to change without notice.

CTV

CHARACTERISTICS

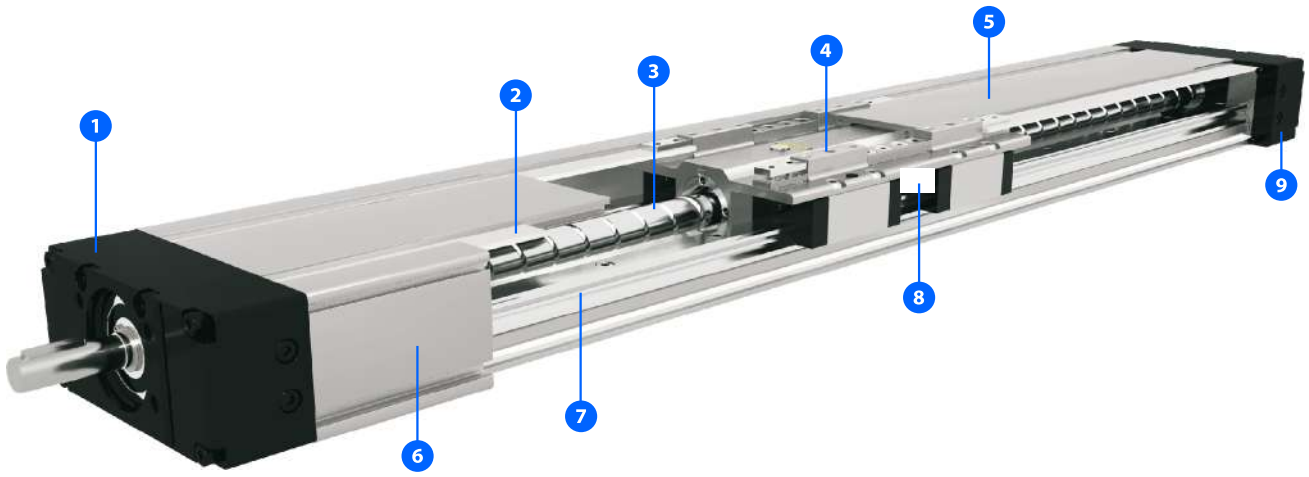
The **CTV** series describes Linear Units with a precision ball screw drive and two parallel, integrated, Zero-backlash rail guides. Compact dimensions allow high performance features such as, high speeds, good accuracy and repeatability.
They can easily be combined to multi-axis systems.
Excellent price-/performance ratio and quick delivery time are ensured.
The compact, precision-extruded aluminum Profile from AL 6063, with two parallel, integrated, Zero-backlash rail guide systems, allows high load capacities and optimal cycles for the movement of larger masses at high speed.
In the Linear Units CTV a precision ball screw, with tolerance class ISO7 (ISO5 on request), with reduced backlash of the ball nut is used.
Two parallel circulating antistatic polyurethane sealing strips and an aluminum cover are ensuring to protect all the parts in the profile from dust and other contaminantions.
Different carriage lengths with lubrication port allows for easy re-lubrication of the ball screw and Ball rail guide system and allows the possibility to attach additional accessories. The re-lubrication can also be done through maintenance holes on the side of the Profile.
The aluminum profile includes T-slots for fixing the Linear Unit and for attaching sensors and switches. Also, a Reed switch can be used here.
For the linear units CTV various adaptation options, for attaching (or redirecting), for Motors or Gearboxes are available.

The aluminium profiles are manufactured according to the medium EN 12020-2 standard

Straightness = 0,35 mm/m; Max. torsion = 0,35 mm/m; Angular torsion = 0,2 mm/40 mm; Parallelism = 0,2 mm

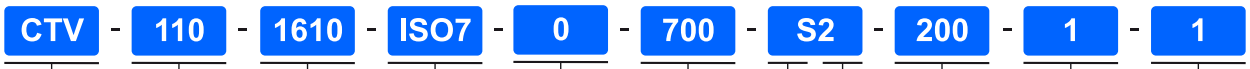
In order to improve the products in this catalogue the specifications are subject to change without notice.

STRUCTURAL DESIGN



1 - Drive block with floating bearing
2 - Gap-type seal of antistatic PU strip (recirculating)
3 - Ball screw tolerance ISO7 (ISO5 available on request)
4 - Carriage; with built in Magnets
5 - Aluminum cover
6 - Aluminium profile-Hard anodized
7 - Two integrated Linear Ball Guideways
8 - Central lubrication port; both sides
9 - End block with fixed bearing

HOW TO ORDER



Series:
CTV

Size:
90
110
145
200

Ball screw :
CTV 90: Ø12×5, Ø12×10
CTV 110: Ø16×5, Ø16×10, Ø16×16
CTV 145: Ø20×5, Ø20×10, Ø20×20, Ø20×50
CTV 200: Ø32×5, Ø32×10, Ø32×20, Ø32×32

Ball screw tolerance :
ISO7 (Standard)
ISO5

Ball screw journal :
0 : Without keyway
1 : With keyway
*CTV 90 only available without keyway - **0***

Absolute stroke [mm] :
(Absolute stroke = Effective stroke + 2 x Safety stroke)

Carriage Version :
S : Short
L : Long

Number of carriages :
The stated number specifies the number of carriages on one Linear unit (up to 5 carriages avaliable)
Leave blank : For the case of one carriage
Connection between the carriages is not rigid

Distance between two carriages [mm] :
Leave blank : For the case of one carriage

Connection plate :
0 : Without
1 : With

Protection cover :
0 : Without antistatic PU Gap-type seal strip
1 : With antistatic PU Gap-type seal strip (Standard)
2 : With Corrosion-resistant protection strip

In order to improve the products in this catalogue the specifications are subject to change without notice.

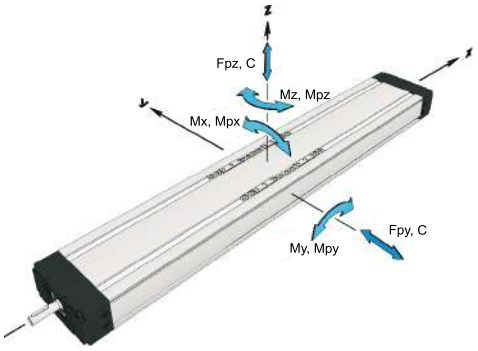
*For lengths / stroke over the stated value in the table above please contact us.
Values for max. stroke are not valid for multiple carriages
(equation of defining the linear unit length for particular size of the linear unit needs to be used).

Recommended values of loads:

All the data of dynamic moments and load capacities stated in the upper table are theoretical without considering any safety factor. The safety factor depends on the application and its requested safety. We recommend a minimum safety factor (fs =5.0)

Modulus of elasticity

E = 70000 N / mm^2



Operating conditions	
Operating temp.	0°C ~ +60°C
Duty cycle	100%

For operating temperature out of the presented range, please contact us.

(max. drive speed: 3000 1/min; No load torque: approx. 0,5 Nm)

**For a bigger value an additonal adapter plate is used. For the case of MTV 40 a thicker plate may be used.*

***This is the load which is linearly dependent on the max. drive torque and is generated by the correct pretension of the belt. This load needs to be reduced in accordance with the capabilities of the motor.*

****This is an average value. It could differ depending to the motor dimensions.*

*****Minimum dimension L1 depends on the size of particular clamping set. Values can be found in the table on page 7.105.0.*

Dimensions

General

The linear units are mounted by using fixtures which are placed in the slot on the side of the profile.

Linear Unit must be mounted by the aluminium profile!

CT	Torsional rigidity per meter	Nm/rad

INSTALLATION

The overall length Lt is best determined as the distance between shaft ends - length Lw plus 2x dimension H.

SELECTION DIAGRAM

Ideal execution for long distance shat connections.
Torque transmission is zero backlash. Designed for lengths up to 4m without bearing support (depending on rotation speed).

Standard lenghts available till 3m, for longer lengths please contact us.

HOW TO ORDER

OSR - 19 - MTJ65 - LM - 890 - F16C - F16C

Type:
OSL
OSR

Size:
OSL: 14, 19/24, 24/28, 28/38, 38/45
OSR: 19, 24, 28, 38

Linear unit series:
MTJ/MRJ/MTJ ECO: 40, 65, 80, 110
CTJ: 90, 110, 145, 200
Leave blank : not for linear unit

Length type:
LM (Middle distance of the linear units)
Lt (Production length of the sync. shaft)

Option:
C: with keyway
Leave blank: w/o keyway

Hole diameter:
— one side end hub [1]
--- other side end hub [2]

Length [mm]

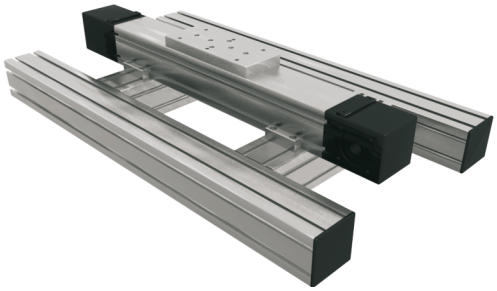
CONNECTION ELEMENTS FOR CUNSTRICTIONS WITH ALU PROFILES



Linear Unit must be mounted by the aluminium profile and not at the end blocks!

For more details about Alu profiles see PROFILE TECHNIC catalogue.

MULTI AXIS SYSTEMS

We offer all neccessary fittings including brackets, clamping fixtures and adapter plates in order to build multi-axis systems. Beside standard elements we supply also custom fixing and connection elements manufactured in our workshop.

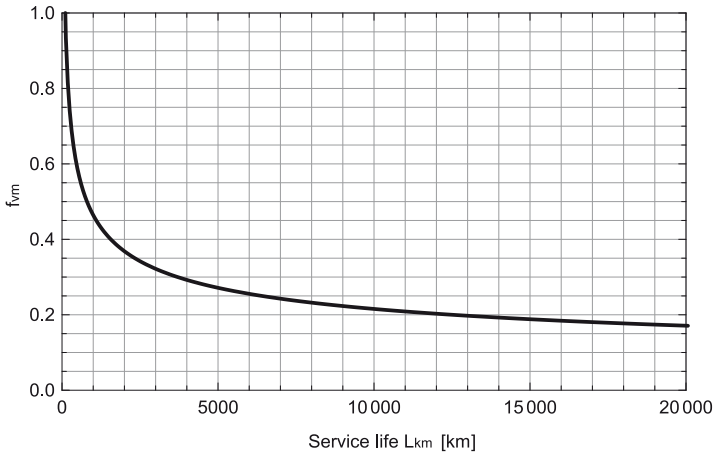
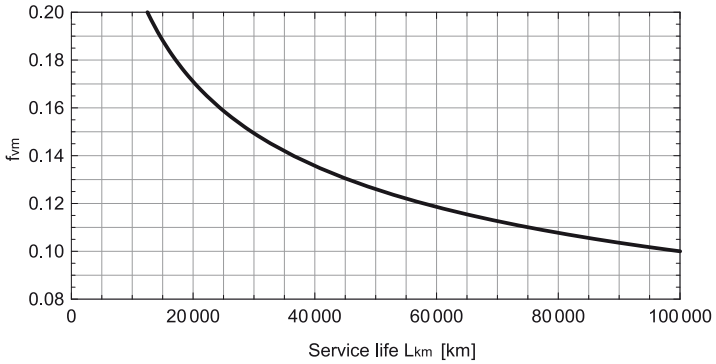
Service life / Permissible load factor

SERVICE LIFE - LINEAR GUIDING

Mean load comparison factor f_{vm} as a function of service life L_{km}



Detailed view:



Diagrams and equations are valid for:

- *MTJ series*
- *MTV series*
- *MTJ ECO series*
- *MTJZ series*
- *CTJ series*
- *CTV series*

Presented diagrams are showing theoretically determined service life of the linear guiding when mean load comparison factor fvm is taken into consideration.

Load comparison factor f_v:

$$f_v = \frac{|F_y|}{C_{dyn}} + \frac{|F_z|}{C_{dyn}} + \frac{|M_x|}{M_{x\,dyn}} + \frac{|M_y|}{M_{y\,dyn}} + \frac{|M_z|}{M_{z\,dyn}}$$

fv	Load comparison factor	
Cdyn	Dynamic load capacity	N
Mx dyn	Dynamic moment capacity about the x axis	Nm
My dyn	Dynamic moment capacity about the y axis	Nm
Mz dyn	Dynamic moment capacity about the z axis	Nm
Fy	Applied force in the y direction	N
Fz	Applied force in the z direction	N
Mx	Applied moment about the x axis	Nm
My	Applied moment about the y axis	Nm
Mz	Applied moment about the z axis	Nm

Service life calculation:

$$L_{km} = \left(\frac{1}{f_{vm}}\right)^3 \cdot 10^2$$

Lkm Service life [km]

Safety factor f_s:

$$f_s = \frac{1}{f_{vm}}$$

fs Safety factor

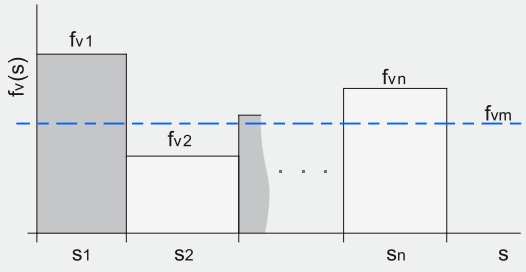
The safety factor depends on the application and its requested safety. We recommend a minimum safety factor fs = 5.0

Mean load comparison factor f_{vm} calculation:

$$f_{vm} = \sqrt[3]{\frac{f_{v1}^3 \times s_1 + f_{v2}^3 \times s_2 + \ldots + f_{vn}^3 \times s_n}{s_1 + s_2 + \ldots + s_n}}$$

fvm	Mean load comparison factor
fv i	i-th load comparison factor of a given loading regime fv (s), i ∈ {1,2,...,n}
si	i-th travel path of a given loading regime fv (s), i ∈ {1,2,...,n}

Loading regime fv (s):



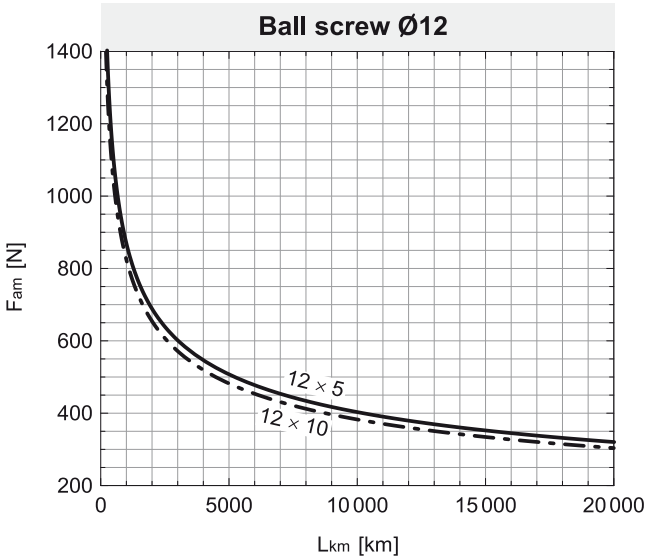
PERMISSIBLE LOAD FACTOR fp - LINEAR GUIDING

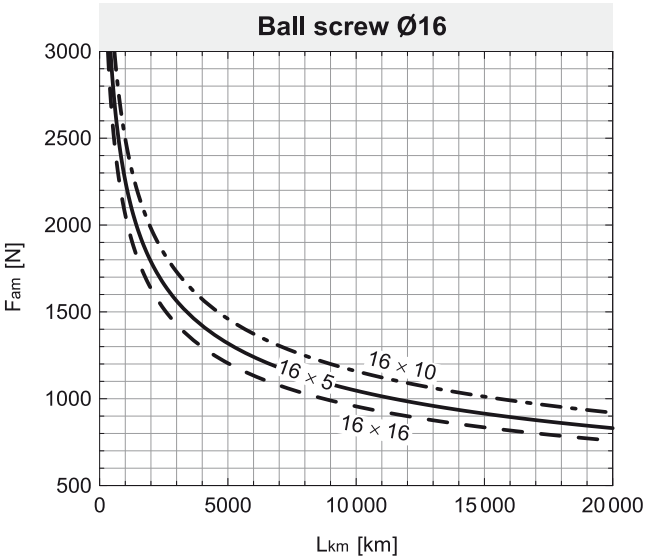
$$f_p = \frac{|F_y|}{F_{py}} + \frac{|F_z|}{F_{pz}} + \frac{|M_x|}{M_{px}} + \frac{|M_y|}{M_{py}} + \frac{|M_z|}{M_{pz}} \leq 1$$

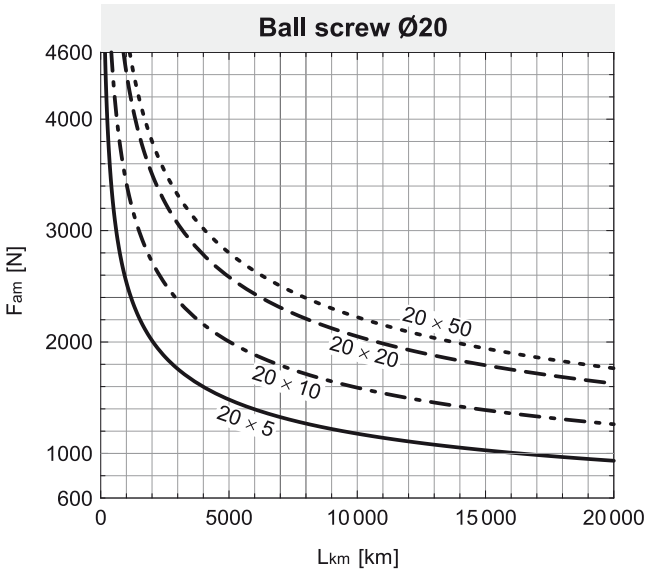
fp	Permissible load factor	
Fpy	Max. permissible force in the y axis	N
Fpz	Max. permissible force in the z axis	N
Mpx	Max. permissible moment about the x axis	Nm
Mpy	Max. permissible moment about the y axis	Nm
Mpz	Max. permissible moment about the z axis	Nm

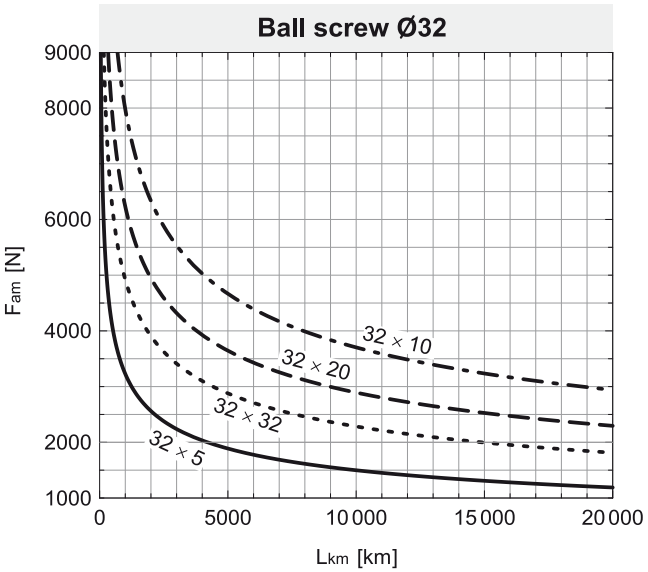
SERVICE LIFE - BALL SCREW

Applied mean axial force Fam as a function of service life Lkm









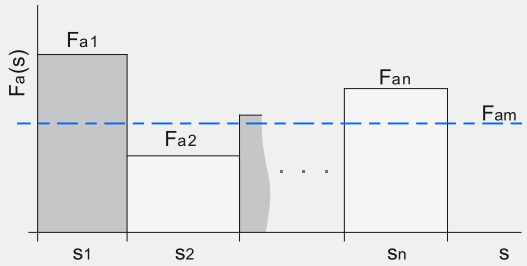
Mean axial force Fam calculation:

$$Fam = \sqrt[3]{\frac{|Fa1|^3 \times s1 + |Fa2|^3 \times s2 + \ldots + |Fan|^3 \times sn}{s1 + s2 + \ldots + sn}}$$

Fam	Mean axial force
Fa i	i-th axial force of a given loading regime Fa (s), i ∈ {1,2,...,n}
si	i-th travel path of a given loading regime Fa (s), i ∈ {1,2,...,n}

Diagrams presented above are showing theoretically determined service life of the ball screw when mean axial force Fam is taken into consideration.

Loading regime Fa (s):



Diagrams and equations are valid for:

- *MTV series*
- *CTV series*

In order to improve the products in this catalogue the specifications are subject to change without notice.
